Forward looking statements & non-GAAP measures

Caution Regarding Forward-Looking Statements

Bank of Montreal's public communications often include written or oral forward-looking statements. Statements of this type are included in this document, and may be included in other filings with Canadian securities regulators or the U.S. Securities and Exchange Commission, or in other communications. All such statements are made pursuant to the "safe harbor" provisions of, and are intended to be forward-looking statements under, the United States *Private Securities Litigation Reform Act of 1995* and any applicable Canadian securities legislation. Forward-looking statements may involve, but are not limited to, comments with respect to our objectives and priorities for 2015 and beyond, our strategies or future actions, our targets, expectations for our financial condition or share price, and the results of or outlook for our operations or for the Canadian, U.S. and international economies.

By their nature, forward-looking statements require us to make assumptions and are subject to inherent risks and uncertainties. There is significant risk that predictions, forecasts, conclusions or projections will not prove to be accurate, that our assumptions may not be correct and that actual results may differ materially from such predictions, forecasts, conclusions or projections. We caution readers of this document not to place undue reliance on our forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the targets, expectations, estimates or intentions expressed in the forward-looking statements.

The future outcomes that relate to forward-looking statements may be influenced by many factors, including but not limited to: general economic and market conditions in the countries in which we operate; weak, volatile or illiquid capital and/or credit markets; interest rate and currency value fluctuations; changes in monetary, fiscal or economic policy; the degree of competition in the geographic and business areas in which we operate; changes in laws or in supervisory expectations or requirements, including capital, interest rate and liquidity requirements and guidance; judicial or regulatory proceedings; the accuracy and completeness of the information we obtain with respect to our customers and counterparties; our ability to execute our strategic plans and to complete and integrate acquisitions, including obtaining regulatory approvals; critical accounting estimates and the effect of changes to accounting standards, rules and interpretations on these estimates; operational and infrastructure risks; changes to our credit ratings; general political conditions; global capital markets activities; the possible effects on our business of war or terrorist activities; disease or illness that affects local, national or international economies; natural disasters and disruptions to public infrastructure, such as transportation, communications, power or water supply; technological changes; and our ability to anticipate and effectively manage risks associated with all of the foregoing factors.

We caution that the foregoing list is not exhaustive of all possible factors. Other factors and risks could adversely affect our results. For more information, please see the Enterprise-Wide Risk Management section on pages 77 to 105 of BMO's 2014 Annual MD&A, which outlines in detail certain key factors and risks that may affect Bank of Montreal's future results. When relying on forward-looking statements to make decisions with respect to Bank of Montreal, investors and others should carefully consider these factors and risks, as well as other uncertainties and potential events, and the inherent uncertainty of forward-looking statements. Bank of Montreal does not undertake to update any forward-looking statements, whether written or oral, that may be made from time to time by the organization or on its behalf, except as required by law. The forward-looking information contained in this document is presented for the purpose of assisting our shareholders in understanding our financial position as at and for the periods ended on the dates presented, as well as our strategic priorities and objectives, and may not be appropriate for other purposes.

Assumptions about the level of default and losses on default were material factors we considered when establishing our expectations regarding the future performance of the transactions into which our credit protection vehicle has entered. Among the key assumptions were that the level of default and losses on default would be consistent with historical experience. Material factors that were taken into account when establishing our expectations regarding the risk of future credit losses in our credit protection vehicle and risk of loss to Bank of Montreal included industry diversification in the portfolio, initial credit quality by portfolio, the first-loss protection incorporated into the structure and the hedges into which Bank of Montreal has entered.

Assumptions about the performance of the Canadian and U.S. economies, as well as overall market conditions and their combined effect on our business, are material factors we consider when determining our strategic priorities, objectives and expectations for our business. In determining our expectations for economic growth, both broadly and in the financial services sector, we primarily consider historical economic data provided by the Canadian and U.S. governments and their agencies. See the Economic Review and Outlook section of our First Quarter 2015 Report to Shareholders.

Non-GAAP Measures

Bank of Montreal uses both GAAP and non-GAAP measures to assess performance. Readers are cautioned that earnings and other measures adjusted to a basis other than GAAP do not have standardized meanings under GAAP and are unlikely to be comparable to similar measures used by other companies. Reconciliations of GAAP to non-GAAP measures as well as the rationale for their use can be found in Bank of Montreal's First Quarter 2015 Report to Shareholders and BMO's 2014 Annual Report, all of which are available on our website at www.bmo.com/investorrelations.

Examples of non-GAAP amounts or measures include: efficiency and leverage ratios; revenue and other measures presented on a taxable equivalent basis (teb); amounts presented net of applicable taxes; adjusted net income, revenues, non-interest expenses, earnings per share, effective tax rate, ROE, efficiency ratio and other adjusted measures which exclude the impact of certain items such as, acquisition integration costs, amortization of acquisition-related intangibles assets and decrease (increase) in collective allowance for credit losses.

Bank of Montreal provides supplemental information on combined business segments to facilitate comparisons to peers.

Balanced and disciplined approach to capital management

Common Equity Tier 1 Ratio (%)

Risk Weighted Assets (\$B)

- Common Equity Tier 1 Ratio of 10.1% was unchanged from Q4'14 with increase in CET1 capital offset by higher RWA
 - Impact of retained earnings growth (+20 bps), partially offset by share repurchases (-10 bps)
 - Source currency RWA up ~\$2 billion due to:
 - business growth (+\$5B)
 - higher market risk (+\$2B)
 - partially offset by changes in methodology (-\$4B) and
 - changes in book quality (-\$1B)
 - FX movement increased RWA by ~\$14B, with this offset by higher accumulated other comprehensive income
- Book value per share up 10% and 3 million shares repurchased in the quarter

Reported Net Income	174	225	159
Efficiency Ratio⁴ (%)	51.9	55.9	44.5

- Traditional wealth earnings up 28% Y/Y driven by strong growth in client assets and the acquired F&C business. Q/Q up 16%
- Insurance earnings of \$31MM or \$72MM excluding a \$41MM after-tax charge from movement in interest rates
- Net revenue up 19% Y/Y; down 6% Q/Q
- Expenses up Y/Y primarily due to F&C, higher revenue-based costs and a stronger U.S. dollar. Q/Q relatively flat as prior quarter legal settlement offset by stock-based compensation for employees eligible to retire of \$27MM recognized in Q1
- AUM/AUA up 43% Y/Y or 18% excluding F&C driven by the stronger U.S. dollar, market appreciation and growth in new client assets

Adjusted Net Income (\$MM)

AUM/AUA(\$B)

Net Income	276	191	221
Reported Net Income	276	191	221
Efficiency Ratio (%)	62.5	70.8	67.6

- Adjusted net income down 20% Y/Y; up 15% Q/Q
- Revenue down 5% Y/Y and up 14% Q/Q
 - Y/Y revenue down as good trading revenue was more than offset by credit and funding valuation adjustments and lower Investment and Corporate Banking revenue, in part due to lower securities gains
 - Q/Q revenue up due to higher trading revenue
- Expenses up 2% Y/Y and up 9% Q/Q
 - Excluding the impact of the stronger U.S. dollar, expenses were down 2% Y/Y due to lower employee-related expenses
 - Q/Q expenses up largely due to stock-based compensation for employees eligible to retire recognized in Q1 (\$23MM), increased support costs driven by changing business and regulatory environment and the stronger U.S. dollar
- Higher allocated capital given F2015 methodology change reduced return on equity in Q1

¹Annual average

^{*}Estimates as of February 26, 2015; Eurozone estimates provided by OECD

Canada

- The economy is growing at a moderate pace, supported by low interest rates, a weaker currency and stronger U.S. demand
- More modest GDP growth of 2.0% is expected in 2015 due to declining investment in the energy sector, though exports should continue to strengthen
- The Bank of Canada is expected to reduce interest rates again in March
- The Canadian dollar should weaken moderately further against the greenback in response to lower interest rates in Canada than in the U.S.

United States

- After growing strongly in Q3, the economy likely slowed recently due to a decline in energy investment and a rising currency
- A healthier consumer will help economic growth strengthen to 3.1% in 2015, with additional support from the recovery in housing markets
- The unemployment rate is expected to fall below 5% this year
- The Federal Reserve will likely begin raising interest rates in September
- The U.S. dollar is expected to strengthen further in 2015 as the Federal Reserve shifts toward tighter policy
