

# Semi-Annual Management Report of Fund Performance

## BMO Harris Canadian Money Market Portfolio

For the period ended June 30, 2013

This semi-annual management report of fund performance contains financial highlights, but does not contain semi-annual or annual financial statements of the Portfolio. If the semi-annual or annual financial statements of the Portfolio do not accompany the mailing of this report, you may obtain a copy of the semi-annual or annual financial statements at your request, and at no cost, by calling 1-800-361-1392, by e-mailing us at [contact.centre@bmo.com](mailto:contact.centre@bmo.com), by writing to us at BMO Harris Investment Management Inc., 1 First Canadian Place, 100 King St. W., 41st Floor, Toronto, Ontario, M5X 1H3 or by visiting our website at [www.bmoharrisprivatebanking.com](http://www.bmoharrisprivatebanking.com) or SEDAR at [www.sedar.com](http://www.sedar.com). You may also contact us using one of these methods to request a copy of the Portfolio's proxy voting policies and procedures, proxy voting disclosure record and/or quarterly portfolio disclosure.

### Management Discussion of Fund Performance

*BMO Harris Investment Management Inc. ("BHIMI" or the "Manager"), the manager and portfolio manager, is responsible for the management of the overall business, investments and operations of the BMO Harris Private Portfolios and has engaged BMO Asset Management Inc. ("BMO AM Inc." or the "sub-advisor") as the sub-advisor of BMO Harris Canadian Money Market Portfolio (the "Portfolio").*

#### Results of Operations

For the six-month period ended June 30, 2013, the Portfolio returned 0.58%, after expenses. The Portfolio's benchmark is the DEX 91 Day T-Bill Index, which generated a 0.48% total return over the same six-month period.

The global economic outlook was largely characterized by uneven and generally sub-par growth during the period, as the economy entered its fifth year of recovery. While the U.S. economy gained traction, albeit slowly, China's economic growth slowed as the country's comparatively solid domestic demand couldn't counter the drag of increased credit restraints, reduced exports and a strengthening currency. After outperforming its peers in 2012, the Canadian economy appeared to slow as domestic demand fell in response to a further moderation in housing, tepid consumption from debt-laden consumers, and tighter provincial and federal budgets.

The three-month Government of Canada Treasury bill ("Canada T-bill") yield ended the period at 1.04%, higher than its December close. The prime rate was 3.00% and the Canadian dollar ended the period at approximately US\$0.95, which was around six cents lower than its December close.

The sub-advisor maintained the credit quality of the Portfolio over the period, keeping a slightly higher weighting in government-issued securities and high-quality corporate sector holdings. As a result, the Portfolio's exposure to government securities was marginally higher at the end of the period to reflect the sub-advisor's emphasis on high-quality and liquid money market instruments. Within this sector, the Portfolio's provincial allocation was higher than its Canada T-bill weighting to take advantage of yield enhancement opportunities between the provincial and federal money market sectors.

Within the Portfolio's corporate sector allocation, there was a modestly higher weighting in bank notes and corporate paper, and a modestly reduced exposure to corporate bonds maturing in less than one year. The sub-advisor believes this positioning provides additional yield enhancement.

The eurozone's debt challenges continued during the period, and the economies of Cyprus, Greece, Portugal and other peripheral European countries also continued to struggle. There is a massive youth jobless rate of close to 60% in Spain and Greece, and the youth jobless rate is above 40% in both Italy and Portugal.

## BMO Harris Canadian Money Market Portfolio

---

Additionally, output growth in Mexico, Latin America and many countries in the Asia-Pacific region has slowed against the backdrop of reduced international demand. Such government uncertainties — including renewed political unrest in Egypt and other lingering geopolitical uncertainties — underscore the ongoing risks that the global economy must still overcome.

Labour markets in Canada have been soft, as the year-to-date pace remains well below that of the previous years and housing sector activity remains moderate as the federal government tightened mortgage rules in 2013. Concerns remain that a considerable amount of new condominium units coming to market over the next couple of years could put additional downward pressure on home prices and construction activity. Although the sub-advisor believes exports could improve as a result of an accelerating U.S. economy, the sub-advisor also believes export growth is likely to be insufficient in preventing a somewhat weak gross domestic product growth figure of 1.5% for 2013. As a result of this weakness, the Bank of Canada (the “BoC”) maintained its 1.00% overnight lending rate during the reporting period. In a recent statement, the BoC noted that the gradual economic recovery remains intact despite a stronger start to the year for the Canadian economy. The BoC also stated that its current policy stance is appropriate for the time being, but that a higher overnight rate will eventually be required.

*For information on the Portfolio’s longer-term performance and composition, please refer to the Past Performance section and Summary of Investment Portfolio section of this report.*

### **Recent Developments**

The sub-advisor will continue to assess the economic outlook and adjust the term of the investments held by the Portfolio accordingly, while emphasizing high-quality government and corporate holdings to help enhance the Portfolio’s returns. The average term of the investments held by the Portfolio will be adjusted in response to the sub-advisor’s assessment of the economy and any anticipated changes in Canadian interest rates.

### *Future Accounting Standards*

Canadian investment entities will be required to prepare their financial statements in accordance with International Financial Reporting Standards (“IFRS”), as issued by the International Accounting Standards Board, for fiscal years beginning on or after January 1, 2014. For reporting periods commencing January 1, 2014, the Portfolio will adopt IFRS as the basis for preparing its financial statements. The Portfolio will report its financial results for the interim period ending June 30, 2014, prepared on an IFRS basis. It will also provide comparative data on an IFRS basis, including an opening balance sheet as at January 1, 2013 (transition date). A summary of the significant standards impacting the Portfolio under IFRS are outlined below.

Based on the Portfolio’s analysis to date, the more significant accounting changes that will result from its adoption of IFRS will be in the areas of fair valuation, cash flow presentation, consolidation of investments and classification of net assets representing unitholders’ equity. The differences described in the sections that follow are based on Canadian generally accepted accounting principles (“Canadian GAAP”) and IFRS that are in effect as of this date. This should not be considered a comprehensive list of the main accounting changes when the Portfolio adopts IFRS.

The framework for fair valuation is set out under IFRS 13 Fair Value Measurement, which includes the requirements for the measurement and disclosure of fair value. If an asset or liability measured at fair value has a bid price and an ask price, the standard requires valuation to be based on a price within the bid-ask spread that is most representative of fair value. The standard allows the use of mid-market pricing or other pricing conventions that are used by market participants as a practical means for fair value measurements within a bid-ask spread. Thus, this standard will impact the net assets per unit for financial statement reporting purposes compared to current standards, and may also result in the elimination of the differences between the net asset per unit and net asset value per unit (“NAVPU”) at the financial statement reporting date. The Manager has not identified any changes that will impact NAVPU as a result of the transition to IFRS.

## BMO Harris Canadian Money Market Portfolio

---

Where the Portfolio holds controlling interest in an investment, it is the Manager's expectation that the Portfolio will qualify as an Investment Entity in accordance with IFRS 10 Consolidated Financial Statements. As such, the Portfolio will not be required to consolidate its investments, but rather to fair value its investments regardless of whether those investments are controlled. If the Portfolio fair values investments that it controls, it may be required to make additional financial statement disclosures on its controlled investments in accordance with IFRS 12 Disclosure of Interests in Other Entities. IFRS 12 also requires additional disclosures if the Portfolio is determined to qualify as an investment entity while not possessing all of the typical characteristics of an investment entity.

The criteria contained within IAS 32 Financial Instruments: Presentation may require unitholders' equity to be classified as a liability within the Portfolio's Statement of Net Assets, unless certain conditions are met. The Manager is currently assessing the Portfolio's unitholder structure to confirm classification.

### Related Party Transactions

BMO Trust Company, an indirect, wholly-owned subsidiary of Bank of Montreal, is the trustee (the "trustee") and BHIMI is the manager of the Portfolio. From time to time, BHIMI may, on behalf of the Portfolio, enter into transactions or arrangements with or involving other members of BMO Financial Group, or certain other persons or companies that are related or connected to the Portfolio (each, a "related party" and collectively, the "related parties").

#### *Sub-advisor*

BHIMI has hired BMO AM Inc., a related party, to provide investment advice and make investment decisions for the Portfolio's investment portfolio. BMO AM Inc. receives an investment advisory fee based on assets under management that is paid monthly. BMO AM Inc. is paid by BHIMI.

#### **Buying and Selling Securities**

##### *Trades in Debt Securities with a Related Party, Trading as Principal*

During the period, the Manager relied on an approval and standing instruction provided by the Portfolio's Independent Review Committee ("IRC") to enable the Portfolio to trade in debt securities in the secondary market with BMO Nesbitt Burns Inc., an affiliate of the Manager, who is trading with the Portfolio as principal (each trade, a "Related Party Transaction"). In accordance with the IRC's approval and standing instruction, in making a decision to cause the Portfolio to make a Related Party Transaction, the Manager and the sub-advisor of the Portfolio are required to comply with the Manager's written policies and procedures governing the Related Party Transaction and report periodically to the IRC, describing each instance that the Manager and the sub-advisor relied on the approval and standing instruction and their compliance or non-compliance with the governing policies and procedures. The governing policies and procedures are designed to ensure the Related Party Transaction (i) is made free from any influence by an entity related to the Manager or any associate or affiliate of the Manager and without taking into account any consideration relevant to the Manager or any associate or affiliate of the Manager, (ii) represents the business judgement of the Manager or sub-advisor, as the case may be, uninfluenced by considerations other than the best interests of the Portfolio, and (iii) achieves a fair and reasonable result for the Portfolio.

#### *Wealth Management Fee*

Units of the Portfolio are only available through the wealth management service offered by BMO Financial Group. The trustee, a related party, receives an annual fee from each investor for the wealth management service offered by BMO Financial Group. A tiered schedule is applied to calculate the annual fee for this service. The fee schedule starts at 1.95% and declines to 0.20% (depending on the nature and size of the investor's investment portfolio), and is calculated as a percentage of the assets under management. The actual

## BMO Harris Canadian Money Market Portfolio

---

wealth management fee payable by each investor is set out in BHIMI's *Investment Management Fee Schedule* that has been provided to the investor when the investor enters into an investment management agreement with the trustee and BHIMI. The wealth management fee is paid directly by the investor to the trustee. The trustee may compensate financial institutions and securities registrants within BMO Financial Group for client referrals to the wealth management service.

### *Unitholder Services*

The Portfolio is provided with certain facilities and services by related parties. BMO AM Inc. is the registrar of the Portfolio. The trustee and BMO AM Inc. are paid by the Portfolio for fees relating to the custodial and administrative services they provide, respectively. Administrative services include fund accounting, record keeping and purchases/redemption order processing. The fees charged to the Portfolio during the period were as follows:

	<b>Period ended June 30, 2013 (\$000s)</b>	<b>Period ended June 30, 2012 (\$000s)</b>
Unitholder Services	153	160

### Management Fee

There is no management fee charged to the Portfolio. The trustee receives an annual fee from investors for the wealth management service offered by BMO Financial Group.

<b>Total Annual Distributions <sup>(3)</sup></b>	<b>\$ 0.06</b>	<b>0.12</b>	<b>0.12</b>	<b>0.07</b>	<b>0.13</b>	<b>0.33</b>
<b>Net assets, end of period</b>	<b>\$ 10.00</b>	<b>10.00</b>	<b>10.00</b>	<b>10.00</b>	<b>10.00</b>	<b>10.00</b>

<sup>(1)</sup> This information is derived from the Portfolio's audited annual financial statements and unaudited June 30, 2013 semi-annual financial statements. The net assets per unit presented in the financial statements differs from the net asset value calculated for Portfolio pricing purposes. An explanation of these differences can be found in the notes to the financial statements.

<sup>(2)</sup> Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period. This table is not intended to be a reconciliation of beginning to ending net assets per unit.

<sup>(3)</sup> Distributions were paid in cash or reinvested in additional units of the Portfolio, or both.

Ratios and Supplemental Data	Six months ended June 30, 2013	Years ended December 31				
		2012	2011	2010	2009	2008
Total net asset value (000s) <sup>(1)</sup>	\$ 1,126,217	1,101,645	1,220,714	1,075,079	1,979,052	2,110,552
Number of units outstanding (000s) <sup>(1)</sup>	112,622	110,165	122,071	107,508	197,905	211,055
Management expense ratio <sup>(2)</sup>	% 0.06	0.06	0.05	0.04	0.02	0.03
Management expense ratio before waivers or management absorptions	% 0.18	0.08	0.05	0.04	0.02	0.03
Trading expense ratio <sup>(3)</sup>	% —	—	—	—	—	—
Portfolio turnover rate <sup>(4)</sup>	% —	—	—	—	—	—
Net asset value per unit	\$ 10.00	10.00	10.00	10.00	10.00	10.00

<sup>(1)</sup> This information is provided as at June 30 or December 31 of the period shown.

<sup>(2)</sup> Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.

<sup>(3)</sup> The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period. For all the financial periods listed, no commissions or portfolio transaction costs were incurred by the Portfolio. As a result, the trading expense ratio for each of the periods was zero.

<sup>(4)</sup> The portfolio turnover rate indicates how actively the Portfolio's sub-advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Portfolio buying and selling all of the securities in its portfolio once in the course of the year. The higher a portfolio turnover rate in a year, the greater the trading costs payable by the Portfolio in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a Portfolio. The portfolio turnover ratio is not applicable to money market funds.

## Past Performance

### General

The Portfolio's performance information assumes that all distributions made by the Portfolio in the periods shown were reinvested in additional units of the Portfolio and is based on the net asset value of the Portfolio.

The performance information does not take into account sales, redemption, distribution or other optional charges that, if applicable, would have reduced returns or performance. Please remember, how the Portfolio has performed in the past does not necessarily indicate how it will perform in the future.

### Year-by-Year Returns

The following bar chart shows the performance for each of the financial years and for the six-month period ended June 30, 2013 shown and illustrates how the performance has changed from year to year. The bar chart shows in percentage terms how an investment made on the first day of each financial year would have increased or decreased by the last day of each financial year.

<sup>(1)</sup> For the six-month period ended June 30, 2013.
