

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE

BMO Global Infrastructure Index ETF (ZGI) (the “ETF”)

For the 12-month period ended December 31, 2021 (the “Period”)

Manager: BMO Asset Management Inc. (the “Manager” and “portfolio manager”)

Management Discussion of Fund Performance

Investment Objective and Strategies

The ETF seeks to replicate, to the extent possible, the performance of an index that is comprised of North American-listed securities of global infrastructure companies, net of expenses. Currently, the ETF seeks to replicate the performance of the Dow Jones Brookfield Global Infrastructure North American Listed Index (the “Index”). The investment strategy of the ETF is to invest in and hold the constituent securities of the Index in the same proportion as they are reflected in the Index. The Manager may also use a sampling methodology in selecting investments for the ETF. As an alternative to or in conjunction with investing in and holding the constituent securities, the ETF may invest in or use certain Other Securities (as defined in the prospectus) to obtain exposure to the performance of the Index.

Risk

The risks associated with an investment in the ETF remain as disclosed in the ETF’s most recent prospectus or any amendments thereto and ETF facts. During the Period, there were no changes to the ETF that materially affected the overall risk level associated with an investment in the ETF. The Manager reviewed the ETF using the standardized investment risk classification methodology prescribed by National Instrument 81-102 *Investment Funds* and determined on January 14, 2021 that the risk rating of the ETF had not changed. The Manager reviews the ETF’s investment risk level and reference index, if any, at least annually.

Results of Operations

The ETF outperformed the broad-based MSCI World Total Return Index by 5.69%. However, the more appropriate comparison is to the Dow Jones Brookfield Global Infrastructure North American Listed Index (the “Index”), due to the concentration of the portfolio in global infrastructure companies. The ETF returned 26.37% versus the Index return of 26.03%. The change in total net asset value during the Period from approximately \$215 million to approximately \$384 million had no impact on the performance of the ETF. The difference in the performance of the ETF relative to the Index during the Period (0.34%) resulted from the management expense ratio (-0.61%), and the impact of sampling and certain other factors (0.95%), which may have included timing and holding differences versus the Index, and market volatility.

Market Conditions

U.S. equity markets continued a strong rally through 2021 and hit another all-time high during the Period. The U.S. was a leader in vaccine rollouts and a successful vaccination campaign led to a reopening of the economy, and increased consumer spending. The U.S. equity market, as measured by the S&P 500 Index, returned 27.6% (in Canadian dollars) over the Period, which was led by the Energy, Real Estate, Financials and Information Technology sectors. The U.S. Federal Reserve Board (“Fed”) continued to provide monetary and fiscal support and the overnight policy rate remained unchanged at 0.25% during the Period. Although the Fed has been accommodative throughout the pandemic, they are signalling a hawkish tone due to inflation concerns which has added more volatility to growth stocks.

This annual management report of fund performance contains financial highlights but does not contain the complete annual financial statements of the ETF. If the annual financial statements of the ETF do not accompany the mailing of this report, you may obtain a copy of the annual financial statements at your request, and at no cost, by calling 1-800-361-1392, by writing to us at BMO Asset Management Inc., 250 Yonge Street, 7th Floor, Toronto, Ontario, M5B 2M8 or by visiting our website at www.bmo.com/etflegal or SEDAR at www.sedar.com. You may also contact us using one of these methods to request a copy of the ETF’s interim financial report, proxy voting policies and procedures, proxy voting disclosure record and/or quarterly portfolio disclosure.

Exchange Traded Funds

BMO Global Infrastructure Index ETF

Canadian equities also continued to recover in 2021, as the S&P/TSX Capped Composite Index, returned 25.1% during the Period. The Bank of Canada also held its target overnight rate at 0.25% over the Period to support the economic recovery. As optimism about COVID-19 vaccines improved, expectations for a strong economic recovery also improved. The Energy sector performed well during the Period as demand for oil increased and production remained low. The West Texas Intermediate (WTI) oil price began the Period at US\$48 per barrel and closed the Period at US\$75 per barrel. Canadian banks continued to outperform as loan loss provisions were reduced, and revenue growth remained strong and diversified across business lines.

In Europe, the spread of the coronavirus variants depressed government bond yields. During the Period, the European Central Bank set its inflation target to 2% in the medium term. The Bank of Japan left its key short-term interest rate unchanged at -0.1% and maintained the target for the 10-year Japanese government bond yield around 0% during the Period. The Bank of Japan committed to purchasing unlimited amounts of government bonds and buying more corporate debt, but in December 2021, the Bank of Japan decided to taper its corporate debt purchases to pre-pandemic levels and scale back some of its emergency funding. The lifting of some pandemic-related restrictions, as well as the monetary and fiscal support measures helped international stocks to recover during the Period. The MSCI EAFE Index, which represents the performance of equities in developed economies outside of North America, returned 10.3% in Canadian dollars over the Period.

Overall, the Infrastructure sector's performance lagged the broader equity market during the Period. The Oil & Gas Storage & Transportation and Specialized REITs sub-industries were the largest contributors to performance, and while also positive, Marine Ports & Services and Airport Services sub-industries, contributed the least to performance. In terms of individual stock contributors, American Tower Corp. and Crown Castle International Corp. contributed the most to performance, while PG&E Corporation and Companhia de Saneamento Basico do Estado de Sao Paulo - SABESP ADR detracted the most from performance. From a regional perspective, U.S. and Canadian stocks contributed the most to the ETF's performance, while Brazilian and Mexican stocks relatively underperformed in terms of contribution to performance.

Recent Developments

The global economy is transitioning from an accelerated growth phase (supported by a worldwide low rates environment) to a deceleration phase whereby the economy is still expanding, albeit at a slower growth rate. Some factors that have slowed the rate of expansion include continued global supply chain issues, further COVID-19 related disruptions, and the expectation of higher global rates. Markets are expected to continue performing and generating positive returns, but the expectation is that those returns will be moderate. Given this economic background, volatility is expected to be elevated through the first half of 2022. As such, the portfolio manager believes that strategies that provide exposure to more defensive sectors, quality names and dividend growth companies could fare well in this environment.

With global market earnings set to moderate in 2022, infrastructure earnings and growth are likely to perform well and outpace the rest of the equity global markets, as historically, moderated economic growth has been linked to positive performance for the sector. In the U.S., the implementation of Biden's infrastructure program will provide a tailwind support to the sector. In Europe and Asia, utility companies are accelerating investments in the solar, wind and clean energy. In the Communications Services sector, firms are building infrastructures for the deployment of 5G networks. With this positive background, the Infrastructure sector could have the potential for strong performance in 2022.

In February 2022, hostilities commenced in Ukraine. In response, a number of countries have imposed economic sanctions on Russia and certain Russian citizens and entities. The impact of the hostilities, economic sanctions and other measures may have wide-ranging global effects on price volatility for securities and commodities as well as the stability of global financial markets. It is uncertain how long the hostilities, economic sanctions and market instability will continue and whether they will escalate further.

Related Party Transactions

From time to time, the Manager may, on behalf of the ETF, enter into transactions or arrangements with or involving other members of BMO Financial Group, or certain other persons or companies that are related or connected to the Manager (each a "Related Party"). The purpose of this section is to provide a brief description of any transactions involving the ETF and a Related Party.

BMO Global Infrastructure Index ETF

Manager

The Manager, an indirect, wholly-owned subsidiary of Bank of Montreal (“BMO”), is the portfolio manager, trustee and promoter of the ETF. The Manager is paid a management fee by the ETF as compensation for its services, which is described in the “Management Fees” section later in this document.

Designated Broker

The Manager has entered into an agreement with BMO Nesbitt Burns Inc., an affiliate of the Manager, to act as designated broker and dealer for distribution of BMO exchange traded funds, on terms and conditions that are comparable to arm’s length agreements in the exchange traded funds industry. The material terms and conditions of the agreement have been disclosed in the ETF’s prospectus.

The Manager has also entered into agreements with certain other registered dealers in Canada to act as dealers for the creation and redemption of units of BMO exchange traded funds.

Buying and Selling Securities

During the Period, the ETF relied on standing instructions provided by the independent review committee (“IRC”) for any of the following related party transactions that may have occurred in the ETF (each, a “Related Party Transaction”):

- (a) investments in securities issued by BMO, an affiliate of the Manager, or any other issuer related to the Manager;
- (b) investments in a class of non-government debt securities and/or equity securities of an issuer during the period of distribution of those securities to the public and/or the 60-day period following the distribution period where BMO Nesbitt Burns Inc., an affiliate of the Manager, or any other affiliate of the Manager acted as an underwriter in the distribution;
- (c) trades in debt securities in the secondary market with BMO Nesbitt Burns Inc., an affiliate of the Manager, that is trading with the ETF as principal; and
- (d) trades of a security from or to, another investment fund or a managed account managed by the Manager or an affiliate of the Manager.

In accordance with the IRC’s standing instructions, in making a decision to cause the ETF to enter into a Related Party Transaction, the Manager and the portfolio manager of the ETF are required to comply with the Manager’s written policies and procedures governing the Related Party Transaction and report periodically to the IRC, describing each instance that the Manager relied on the standing instructions and its compliance or non-compliance with the

governing policies and procedures. The governing policies and procedures are designed to ensure that each Related Party Transaction (i) is made free from any influence of BMO, BMO Nesbitt Burns Inc. or an associate or affiliate of BMO and/or BMO Nesbitt Burns Inc. and without taking into account any considerations relevant to BMO, BMO Nesbitt Burns Inc. or an associate or affiliate of BMO and/or BMO Nesbitt Burns Inc.; (ii) represents the business judgment of the Manager, uninfluenced by considerations other than the best interests of the ETF; and (iii) achieves a fair and reasonable result for the ETF.

Brokerage Commissions

The ETF pays standard brokerage commissions at market rates to BMO Nesbitt Burns Inc., an affiliate of the Manager, for executing a portion of its trades. The brokerage commissions charged to the ETF (excluding exchange and other fees) during the periods were as follows:

		2021	2020
Total brokerage commissions	\$	5,318	6,311
Brokerage Commissions paid to BMO Nesbitt Burns Inc.	\$	2,899	3,751

Financial Highlights

The following tables show selected key financial information about the ETF and are intended to help you understand the ETF’s financial performance for the periods indicated.

The ETF’s Net Assets per Unit⁽¹⁾

Listed CAD Units	Financial years ended Dec. 31				
	2021	2020	2019	2018	2017
Net assets, beginning of period	\$ 35.23	40.83	33.59	34.73	34.62
Increase (decrease) from operations					
Total revenue	\$ 1.55	1.56	1.51	1.31	1.48
Total expenses ⁽²⁾	\$ (0.35)	(0.32)	(0.32)	(0.33)	(0.33)
Realized gains (losses) for the period	\$ 0.73	1.11	0.22	0.98	1.10
Unrealized gains (losses) for the period	\$ 7.13	(6.81)	7.09	(2.38)	(1.36)
Total increase (decrease) from operations⁽³⁾	\$ 9.06	(4.46)	8.50	(0.42)	0.89
Distributions					
From net investment income (excluding dividends)	\$ —	—	—	—	—
From dividends	\$ 1.12	1.30	1.15	1.06	1.15
From capital gains	\$ 0.42	0.95	—	0.19	1.07
Return of capital	\$ 0.02	0.01	0.01	0.01	0.01
Total Annual Distributions⁽⁴⁾	\$ 1.56	2.26	1.16	1.26	2.23
Net assets, end of period	\$ 43.08	35.23	40.83	33.59	34.73

⁽¹⁾ This information is derived from the ETF’s audited annual financial statements.

⁽²⁾ Includes commissions and portfolio transaction costs and withholding taxes.

⁽³⁾ Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period. This table is not intended to be a reconciliation of beginning to ending net assets per unit.

⁽⁴⁾ Distributions were either paid in cash or reinvested in additional units of the ETF, or both.

BMO Global Infrastructure Index ETF

Ratios and Supplemental Data

Listed CAD Units	Financial years ended Dec. 31				
	2021	2020	2019	2018	2017
Total net asset value (000's) ⁽¹⁾	\$ 384,090	215,245	259,667	220,328	304,112
Number of units outstanding (000's) ⁽¹⁾	8,916	6,110	6,360	6,560	8,758
Management expense ratio ⁽²⁾	% 0.61	0.61	0.61	0.60	0.61
Management expense ratio before waivers or absorptions ⁽²⁾	% 0.61	0.61	0.61	0.60	0.61
Trading expense ratio ⁽³⁾	% 0.00	0.00	0.00	0.00	0.01
Portfolio turnover rate ⁽⁴⁾	% 12.51	20.32	20.20	11.95	18.77
Net asset value per unit	\$ 43.08	35.23	40.83	33.59	34.73
Closing market price	\$ 43.09	35.16	40.74	33.48	34.75

⁽¹⁾ This information is provided as at December 31 of the period shown.

⁽²⁾ Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.

⁽³⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.

⁽⁴⁾ The ETF's portfolio turnover rate indicates how actively the ETF's portfolio manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the ETF buying and selling all of the securities in its portfolio once in the course of the year. The higher an ETF's portfolio turnover rate in a year, the greater the trading costs payable by the ETF in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of an ETF.

Management Fees

The Manager is responsible for the day-to-day management of the business and operations of the ETF. The Manager monitors and evaluates the ETF's performance, manages the portfolio and provides certain administrative services required by the ETF. As compensation for its services, the Manager is entitled to receive a management fee payable quarterly and calculated based on the daily net asset value of the ETF at the annual rate set out in the table below. The management fee is subject to applicable taxes. The Manager may, from time to time in its discretion, waive all or a portion of the management fee charged.

Ticker	Annual Management Fee Rate %
ZGI	0.55

Past Performance

The ETF's performance information assumes that all distributions made by the ETF in the periods shown were used to purchase additional units of the ETF and is based on the net asset value of the ETF.

The performance information does not take into account sales, redemption, distribution or other optional charges that, if applicable, would have reduced returns or performance. Please remember that how the ETF has performed in the past does not indicate how it will perform in the future.

On September 21, 2012, the ETF changed its investment objective and underlying index from the Dow Jones Brookfield Global Infrastructure Index to the Dow Jones Brookfield Global Infrastructure North American Listed Index, which employs the same selection methodology as the former index for determining what constitutes an "infrastructure company", but is comprised of North American listed securities (including American depositary receipts) of global infrastructure companies. This change could have affected the performance of the ETF, had it been in effect throughout the performance measurement periods presented.

Year-by-Year Returns

The following bar chart shows the performance of the ETF for each of the financial years shown and illustrates how the ETF's performance has changed year to year. The chart shows, in percentage terms, how much an investment made on the first day of each financial year would have increased or decreased by the last day of each financial year.

Annual Compound Returns

This table compares the historical annual compound returns of the ETF with its benchmark index, the Dow Jones Brookfield Global Infrastructure North American Listed Index and a broad-based index, the MSCI World Total Return Index.

The Dow Jones Brookfield Global Infrastructure North American Listed Index measures the performance of companies with at least 70% of cash flows deriving from infrastructure lines of business. The Dow Jones Brookfield Global Infrastructure North American Listed Index constituent securities must be listed in either the U.S. or Canada.

BMO Global Infrastructure Index ETF

The MSCI World Total Return Index is a broad global equity index that represents large- and mid-capitalization equity performance across 23 developed markets countries. It covers approximately 85% of the free float-adjusted market capitalization in each country.

As at December 31, 2021

Listed CAD Units		1Yr	3Yr	5Yr	10Yr	Since Inception
BMO Global Infrastructure Index ETF	%	26.37	12.31	7.73	11.38	
Dow Jones Brookfield Global Infrastructure North American Listed Index	%	26.03	12.07	7.60	—	
MSCI World Total Return Index	%	20.68	18.73	13.63	15.19	

A discussion on the relative performance of the ETF as compared to its benchmark index and broad-based index can be found under the Results of Operations section of this report.
