

SEMI-ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE

BMO S&P/TSX Equal Weight Industrials Index ETF (ZIN) (the “ETF”)

For the six-month period ended June 30, 2017 (the “Period”)

Manager: BMO Asset Management Inc. (the “Manager” and “portfolio manager”)

Management Discussion of Fund Performance

Results of Operations

The ETF outperformed the broad-based S&P/TSX Capped Composite Index by 4.59%. However, the more appropriate comparison is to the S&P/TSX Equal Weight Industrials Index (the “Index”), due to the concentration of the portfolio in Canadian industrial companies. The ETF returned 5.33% versus the Index return of 5.66%. The change in total net asset value during the Period from approximately \$35 million to approximately \$70 million had no impact to the performance of the ETF.

The difference in the performance of the ETF relative to the Index during the Period (-0.33%) resulted from the payment of management fees (-0.31%), and the impact of sampling and certain other factors (-0.02%), which may have included timing differences versus the Index, and market volatility.

Market Conditions

During the Period, Canadian equities, as represented by the S&P/TSX Capped Composite Index, returned approximately 0.7%, underperforming most other developed equity markets. The Canadian dollar was initially among the weakest currencies in the first quarter of 2017, but rebounded in the second quarter, due to stronger growth, to end the Period higher against the U.S. dollar. In May, the Organization of Petroleum Exporting Countries (“OPEC”) announced oil production cuts; however, high inventory levels in the U.S. drove the commodity price lower, which fell over 19%.

The ETFs exposure to the Construction Machinery & Heavy Trucks and Aerospace & Defense sub-sectors contributed the most to performance, while the Trucking sub-sector detracted from performance. Significant individual contributors to performance were New Flyer Industries Inc. and Air Canada. Individual detractors to performance included exposure to TFI International Inc. and Ritchie Bros Auctioneers Inc.

Recent Developments

The portfolio manager believes that growth in the Canadian economy will continue to strengthen for the remainder of 2017. Stronger global economic growth should help Canadian exports, however, uncertainty in both the housing market and oil prices may present risks to equity growth. The portfolio is well positioned to participate in the equity growth of Canadian equities, in particular if Canadian economic data continues to be strong.

Subsequent Events

Underlying Index Change

Effective on or about September 15, 2017, the underlying index of the ETF will be changed from S&P/TSX Equal Weight Industrials Index to Solactive Equal Weight Canada Industrials Index. The change to the Index will align with the current investment objective and strategies of the ETF.

Fund Name Change

Effective on or about September 15, 2017, the ETF will change its name from BMO S&P/TSX Equal Weight Industrials Index ETF to BMO Equal Weight Industrials Index ETF.

This semi-annual management report of fund performance contains financial highlights but does not contain the complete semi-annual or annual financial statements of the ETF. Related Party Transactions

The Manager, an indirect, wholly-owned subsidiary of Bank of Montreal (“BMO”), is the portfolio manager, trustee and promoter of the ETF. From time to time, the Manager may, on behalf of the ETF, enter into transactions or arrangements with or involving other members of BMO Financial Group, or certain other persons or companies that are related or connected to the Manager (each a “Related Party”). The purpose of this section is to provide a brief description of any transactions involving the ETF and a Related Party.

Designated Broker

The Manager has entered into an agreement with BMO Nesbitt Burns Inc., an affiliate of the Manager, to act as designated broker and dealer for distribution of BMO exchange traded funds, on terms and conditions that are comparable to arm’s length agreements in the exchange traded funds industry. The material terms and conditions of the agreement have been disclosed in the ETF’s prospectus.

The Manager has also entered into agreements with other major dealers in Canada to act as dealers for the creation and redemption of units of BMO exchange traded funds.

Management Fees

The Manager is responsible for the day-to-day management of the business and operations of the ETF. The Manager monitors and evaluates the ETF’s performance, manages the portfolio and provides certain administrative services required by the ETF. As compensation for its services, the Manager is entitled to receive a management fee payable quarterly and calculated based on the daily net asset value of the ETF at the maximum annual rate set out in the table below.

Ticker	Maximum Annual Management Fee Rate %
ZIN	0.55

Brokerage Commissions

The ETF pays standard brokerage commissions at market rates to BMO Nesbitt Burns Inc., an affiliate of the Manager, for executing a portion of its trades. The brokerage commissions charged to the ETF (excluding exchange and other fees) during the periods were as follows:

	2017	2016
Total brokerage commissions	\$ 1,742	1,712
Brokerage commissions paid to BMO Nesbitt Burns Inc.	\$ 1,742	1,712

⁽¹⁾This information is derived from the ETF’s unaudited and audited financial statements. The financial information presented for the periods ended June 30, 2017, December 31, 2016, December 31, 2015, December 31, 2014 and December 31, 2013 is derived from the financial statements determined in accordance with IFRS. Information for years prior to January 1, 2013 is derived from prior period financial statements prepared in accordance with Canadian GAAP.

⁽²⁾Prior to 2013, withholding taxes were not included in expenses as they were included in revenue.

⁽³⁾Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period. This table is not intended to be a reconciliation of beginning to ending net assets per unit.

⁽⁴⁾Distributions were either paid in cash or reinvested in additional units of the ETF, or both. The allocation of the distributions from each of income, dividends, capital gains and return of capital is based on the Manager’s estimate as at June 30 of the period shown, which is the ETF’s semi-annual period end. However, actual allocation of distributions is determined as at December 15, the ETF’s tax year-end. Accordingly, the actual allocation among income, dividends, capital gains and return of capital may differ from these estimates.

⁽⁵⁾The information shown in this column is for the period beginning November 1, 2012 (the ETF’s establishment date) and ending December 31, 2012.

⁽¹⁾ This information is provided as at June 30 or December 31 of the period shown, as applicable.

⁽²⁾ Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.

⁽³⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period. For the periods ended December 31, 2014, December 31, 2013 and December 31, 2012, no commission or portfolio transaction costs were incurred by the ETF. As a result, the trading expense for these periods was zero.

⁽⁴⁾ The ETF's portfolio turnover rate indicates how actively the ETF's portfolio manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the ETF buying and selling all of the securities in its portfolio once in the course of the year. The higher an ETF's portfolio turnover rate in a year, the greater the trading costs payable by the ETF in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of an ETF.

⁽⁵⁾ The information shown in this column is for the period beginning November 1, 2012 (the ETF's establishment date) and ending December 31, 2012.

Past Performance

The ETF's performance information assumes that all distributions made by the ETF in the periods shown were used to purchase additional units of the ETF and is based on the net asset value of the ETF.

The performance information does not take into account sales, redemption, distribution or other optional charges that, if applicable, would have reduced returns or performance. Please remember that how the ETF has performed in the past does not indicate how it will perform in the future.

Year-by-Year Returns

The following bar chart shows the performance of the ETF for each of the financial years shown. The chart shows, in percentage terms, how much an investment made on the first day of each financial year would have increased or decreased by the last day of each financial year.
