

View pricing analysis with the Technical Insight tool

Explore Technical Analysis

This is the practice of anticipating price changes of a stock or index by looking for patterns in price history.

While Technical Analysis has long been exclusive to professional money managers due to its complexity, it's been automated so you can see the patterns with a click of a button.

You'll see short-term and long-term suggestions that a price is rising (bullish) or falling (bearish).

If you have questions
call 1-888-776-6886.

How to get started

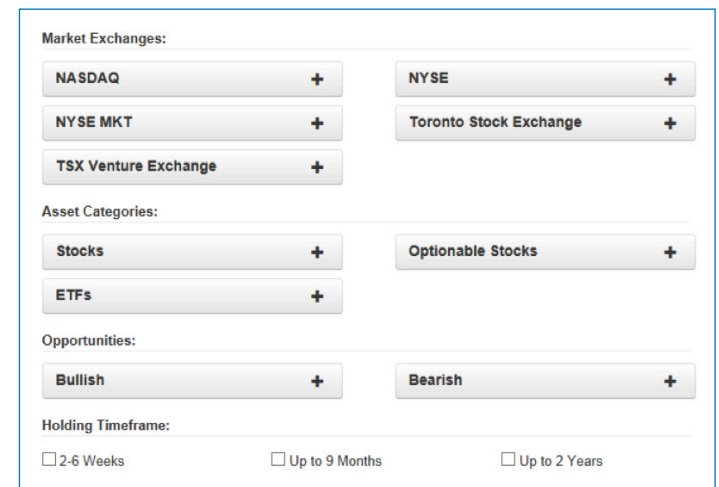

1. Sign into your [BMO InvestorLine](#) account.
2. From **Quotes & Tools**, click **Technical Insight**.

3. Simply type symbol or name into the tool to start.

4. Or set your own preferences for stocks or indices to follow. Then set Alerts so you're notified when significant technical events occur.

5. See **Education** on the Technical Insight page for the ins and outs of Technical Analysis.
