Interest Cost at Amortization

Interest Cost for the Term

Special Payment

In these calculations we assume the following: (1) the interest rate is the same for the entire amortization period, (2) interest is compounded half-yearly for fixed interest rates and monthly for variable interest rates; and (3) the payment schedule you selected is maintained with no additional payments or skipped payments, unless selected by you. This table reflects the information you enter.

These calculations are approximate and for information purposes only. Actual payment amounts may differ and will be determined at the time of your application. Please do not rely solely on this information or result when making financial decisions; please visit your branch or speak to a mortgage specialist.
