

DISCLAIMER: The voluntary carbon market disclosures below are made pursuant to California Assembly Bill (AB) 1305, Part 10 of Division 26 of the Health and Safety Code (passed 2023-10-07) as amended from time to time, also known as the Voluntary Carbon Market Disclosures Act (VCMDA). The VCMDA requires certain disclosures from business marketing and selling carbon offsets in California. These disclosures indicate BMO's relevant disclosures under Section 44475.

BMO is an intermediary and not the credit developer or project owner for the below described project. Therefore, BMO does not generate or manage the below provided data or information and cannot guarantee its accuracy. Rather, BMO relies on the relevant voluntary carbon registry and the data or information provided to that registry by the project owners, developers, and verifiers to comply with the VCMDA disclosures.

| Project Description | Nestled in the lush jungles of eastern Cambodia, the Keo Seima Wildlife Sanctuary (KSWS) is a haven for biodiversity and a vast storehouse of forest carbon. Spanning over 290,000 hectares, the protected area is home to a diverse array of wildlife, including 84 globally threatened species and the world's largest population of black-shanked douc and yellow-cheeked crested gibbon. The KSWS also holds a unique cultural significance for the Indigenous Bunong people, who have called this forest home for centuries and whose culture and livelihoods are deeply entwined with the forest. Despite the importance of this area, it faces a high threat of deforestation due to various factors, including forest conversion for agriculture and illegal logging. The Keo Seima Wildlife Sanctuary REDD+ Project (KSWS REDD+), launched in 2010 as a collaboration between the Royal Government of Cambodia (RGC) and the Wildlife Conservation Society (WCS), has made impressive strides in reducing deforestation and promoting alternative livelihoods. The project has prevented the release of more than 20 million tons of CO2e emissions and saved 25,000 hectares of forest from destruction. It has also created jobs, supported education and training initiatives, and established an ecotourism venture that supports local communities. The project has also distributed nearly \$1 million through its Cash for Communities (C4C) program, a mechanism that shares the revenue of carbon credits sales. These funds go directly to local communities, who decide how they should be spent to support sustainable development activities such as healthcare, education, and infrastructure like wells and bridges. In Cambodia, the Ministry of Environment is at the forefront of protecting the country's protected areas, with a focus on preserving the nation's forests. The WCS is a leading global conservation organization operating in 60+ countries and brings its extensive knowledge and experience in conservation to the project. |
| Protocol | VM0015: Methodology for Avoided Unplanned Deforestation, v1.2 |

| | |
|---|--|
| Project Location | Eastern Cambodia, Keo Seima Wildlife Sanctuary (KSWS) |
| Project Timeline (BMO interprets this as the full crediting period of the project) | 01/01/2010 - 31/12/2069 |
| Project Start Date | January 1, 2010 |
| Emissions Reduction Dates & Quantities Issued | The Emission Reduction Dates & Quantities Issued can be found on the registry's site for this Project: [Project Description] |
| Project Type | REDD |
| Emissions Type | Avoided emissions |
| Standards Met | Project vintage meets the standard of VM0015 as evidenced by registry listing and third party verification reports provided by Verra's site here [Verra Project Summary] |
| Durability | More information about durability can be found on Verra's website here: [Project Description] |
| Third Party Verifier | SCS Global Services |
| Volume of emissions removed or reduced annually | 1,426,648 Tons [Verra Project Summary] |
| Reversal Measures | More information about reversal measures can be found on Verra's website here: [Project Description] |
| Source Data and calculation methods to reproduce / verify emissions reduction or removal credits issued | Refer to project documentation uploaded to the Registry. https://registry.verra.org/app/projectDetail/VCS/1650 |
