Project Name	Bundled Solar Photovoltaic Project by ACME
Registry	Verra Registry
Registry ID	1753
Registry Link	<a href="https://registry.verra.org/app/projectDetail/VCS/1753">https://registry.verra.org/app/projectDetail/VCS/1753</a>
Applicable Vintage	2017, 2018, 2019, 2020
Project Description	The proposed project activity is a step towards supporting the implementation and installation of grid connected renewable solar energy power plants in India. The implementation of project activity ensures energy security, diversification of the grid generation mix and sustainable growth of the electricity generation sector in India. The main goal of project activity is to implement renewable energy projects in the country and the significant importance of revenues from sale of Verified Carbon Units (VCUs) to achieve this goal forms the basis of the implementation of this project activity. The project activity is a voluntary action and each SPV will be the Project Proponent for their project activity. ACME Cleantech Solutions Private Limited as a parent company formed different SPV (Special Purpose Vehicles) for solar projects and projects are developed by name of SPVs. There are no mandatory laws or regulations existing in India requiring PP or any other party to develop a programme for renewable generation plants.
Protocol	ACM0002: Grid-connected electricity generation from renewable sources
Project Location	Indian states of Telangana, Uttarakhand, Karnataka, Andhra, Pradesh, and Rajasthan
Project Timeline (BMO interprets this as the full crediting period of the project)	10/02/2017 - 09/02/2027
Project Start Date	February 10, 2017
Emissions Reduction Dates & Quantities Issued	The Emission Reduction Dates & Quantities Issued can be found on the registry's site for this Project: [ <a href="#">Project Description</a> ]
Project Type	Energy industries (renewable/non-renewable sources)
Emissions Type	Avoided emissions

Standards Met	Project vintage meets the standard of ACM0002 as evidenced by registry listing and third party verification reports provided by Verra's site here [ <a href="#">Verra Project Summary</a> ]
Durability	More information about durability can be found on Verra's website here: [ <a href="#">Project Description</a> ]
Third Party Verifier	LGAI Technological Center, S.A. (Applus+)
Volume of emissions removed or reduced annually	2,078,589 Tons [ <a href="#">Verra Project Summary</a> ]
Reversal Measures	More information about reversal measures can be found on Verra's website here: [ <a href="#">Project Description</a> ]
Source Data and calculation methods to reproduce / verify emissions reduction or removal credits issued	Refer to project documentation uploaded to the Registry. <a href="https://registry.verra.org/app/projectDetail/VCS/1753">https://registry.verra.org/app/projectDetail/VCS/1753</a>
