Project Name	GreenTrees ACRE (Advanced Carbon Restored Ecosystem)
Registry	American Carbon Registry
Registry ID	ACR 114
Registry Link	https://acr2.apx.com/mymodule/reg/prjView.asp?id1=114
Applicable Vintage	2020
Project Description	The project uses tree planting to establish trees on lands that have been in continuous agricultural use and have not been in a forested state for 10 years. Landowners commit to protecting the trees. Limited harvest is allowed after trees grow to the point where crowding of trees is expected to cause some trees to die, but in no case may harvesting occur if it would result in a basal area of live trees of less than 100 square feet per acre after the harvesting. Through 2022 the GreenTrees Program has enrolled 136,650 acres. GreenTrees is a programmatic offset program and continues to enroll new landowners and plant lands to scale GHG removals.
