

DISCLAIMER: The voluntary carbon market disclosures below are made pursuant to California Assembly Bill (AB) 1305, Part 10 of Division 26 of the Health and Safety Code (passed 2023-10-07) as amended from time to time, also known as the Voluntary Carbon Market Disclosures Act (VCM DA). The VCM DA requires certain disclosures from business marketing and selling carbon offsets in California. These disclosures indicate BMO's relevant disclosures under Section 44475.

BMO is an intermediary and not the credit developer or project owner for the below described project. Therefore, BMO does not generate or manage the below provided data or information and cannot guarantee its accuracy. Rather, BMO relies on the relevant voluntary carbon registry and the data or information provided to that registry by the project owners, developers, and verifiers to comply with the VCM DA disclosures.

California's Voluntary Carbon Market Disclosures Business Regulation Act (AB 1305) ("VCM DA")

Project Name	Mast Wood Preserve MT1
Registry	Puro
Registry ID	PURO 272514
Registry Link	https://registry.puro.earth/projects/272514
Applicable Vintage	2025
Project Description	Mast Reforestation's Mast Wood Preserve MT1 facility Terrestrial Storage of Biomass (TSB) project located in Big Horn County, Montana. Mast Reforestation supports forest restoration and wildfire risk reduction efforts by managing woody biomass generated from forest thinning and fuel reduction activities. In these programs, trees unsuitable for commercial timber markets are removed to reduce forest fuel loads; marketable material is directed to conventional wood product pathways, while non-merchantable biomass would otherwise be left to decompose or be burned. Under the Mast Wood Preserve MT1 project, non-marketable woody biomass is placed in an engineered, underground storage chamber designed to retain the carbon contained in the biomass in stable storage for a period exceeding 100 years. The storage system is designed to inhibit biological decomposition through controlled burial conditions, with parameters such as temperature, oxygen availability, moisture, and greenhouse gas concentrations monitored to assess storage performance over time.
Protocol	Terrestrial Storage of Biomass
Project Location	Big Horn County, 59010, MT, United States
Project Timeline (BMO interprets this as the full crediting period of the project)	01 Apr 2025 - 31 Mar 2030
Project Start Date	April 1, 2025
Emissions Reduction Dates & Quantities Issued	The Emission Reduction Dates & Quantities Issued can be found on the registry's site for this Project: https://registry.puro.earth/projects/272514
Project Type	Terrestrial Biomass Storage
Emissions Type	Carbon Removal

Standards Met	Project vintage meets the standard of the Puro Registries methodology Terrestrial Storage of Biomass as evidenced by registry listing and third party audit reports provided by the Puro Registry site here: [https://puro.earth/odoo/documents/5KWQ0gUCTH6YruZDhe6tKwo2a16]
Durability	More information about durability can be found on the Puro Registry website here: [https://puro.earth/odoo/documents/-Zh5UfKDSTmqeNyYRDYh8Ao2a43]
Third Party Verifier	350Solutions
Volume of emissions removed or reduced annually	The annual estimated removal will be 6164.84 CORCs. Use this link from the Puro Registry website for more details: [https://puro.earth/odoo/documents/-Zh5UfKDSTmqeNyYRDYh8Ao2a43]
Reversal Measures	More information about reversal measures can be found on the Puro Registry website here: [https://puro.earth/odoo/documents/-Zh5UfKDSTmqeNyYRDYh8Ao2a43]
Source Data and calculation methods to reproduce / verify emissions reduction or removal credits issued	Refer to project documentation uploaded to the Registry. [https://registry.puro.earth/projects/272514]
