Property Valuation and Indexation Methodology

For property valuation policies, please refer to *BMO Global Registered Covered Bond Program UKLA Base Prospectus - Property Valuation Process* [2025FinalProspectus.pdf](#)

Indexation Methodology

The Guarantor employs an indexation methodology as set out below to determine the Market Value (as defined in the CMHC Guide) of a residential property securing an Eligible Loan in the Portfolio (the "Indexation Methodology") for purposes of the Asset Coverage Test, the Amortization Test and the Valuation Calculation as set forth in the Guarantor Agreement, and for all other purposes as required by the CMHC Guide. Any update or other change to the Indexation Methodology must comply with the requirements of the CMHC Guide and will (i) require notice to CMHC and satisfaction of any other conditions specified by CMHC in relation thereto, (ii) if such update or other change constitutes a material amendment thereto, require satisfaction of the Rating Agency Condition, and (iii) if such update or other change is materially prejudicial to the Covered Bondholders, require the consent of the Bond Trustee.

The Indexation Methodology is based on Teranet - National Bank HPI Monthly Metropolitan Indices covering 32 Canadian Census Metropolitan Areas ("CMAs") with respect to Properties located within those CMAs and Teranet - National Bank Composite 11 House Price Index™ (the "Composite 11 House Price Index"), which is calculated as a weighted average of price data for eleven major cities in Canada, for Properties located in all other areas of Canada. Details of the Composite 11 House Price Index may be found at www.housepriceindex.ca.

For each Property in the Portfolio, the indexed valuation will be determined at least quarterly by multiplying the Original Market Value (as defined in the CMHC Guide) for such Property by the percentage change since the valuation date in the price level for the index in which such Property is located.

Certain risks are associated with the use of the Indexation Methodology, such as (i) the data provided with respect to larger geographical areas could mask localized price fluctuations, and (ii) data on the growth rate for each type of dwelling is not available because the data provided combines all dwelling types and, therefore, the data provided may not reflect price fluctuations for the different types of dwellings. Accordingly, no assurance can be given that the valuation of the Properties in the Portfolio using the Indexation Methodology will result in an accurate determination of the actual realizable value of a particular Property or of the Portfolio as a whole. The Bank can give no assurance as to the accuracy of the information provided by the Indexation Methodology.

Market risks, including interest rate risk, currency risk, credit risk, and liquidity risks

Market Risks

For disclosures of risks including those faced by the Guarantor, please refer to *BMO Global Registered Covered Bond Program UKLA Base Prospectus – RISK FACTORS – RISKS RELATING TO THE COVERED BONDS, RISKS RELATING TO THE PORTFOLIO, RISKS RELATING TO COUNTERPARTIES*

To ensure BMO Global Registered Covered Bond Program's exposure to market risks is monitored, a valuation calculation is performed on monthly basis. The valuation calculation for current reporting period can be found on page 3 of this investor report. For detailed valuation calculation methodology, please see Schedule 10 of the *Guarantor Agreement*

The Guarantor has entered into the Interest Rate Swap Agreement including a swap confirmation with the Interest Rate Swap Provider (initially Bank of Montreal) to provide the Guarantor with a hedge against possible variances in the rates of interest payable on the Loans in the Portfolio (which may, for instance, include variable rates of interest or fixed rates of interest), the interest amounts payable on the Intercompany Loan and (following the Covered Bond Swap Effective Date) the Covered Bond Swap Agreement. The interest rate swap confirmation is effective and cashflows are being exchanged pursuant thereto. The issuer as Interest Rate Swap Provider may be required to post collateral to secure its obligations under the Interest Rate Swap Agreement upon the activation of rating triggers. These rating triggers have not been activated, and no collateral has been posted yet. For details, please see *BMO Global Registered Covered Bond Program UKLA Base Prospectus- Overview of the Principal Documents—Interest Rate Swap Agreement*

To provide the Guarantor with a hedge against currency risks arising, following the Covered Bond Swap Effective Date, in respect of amounts received by the Guarantor under the Interest Rate Swap Agreement and amounts payable in respect of its obligations under the Covered Bond Guarantee, the Guarantor has entered into the Covered Bond Swap Agreement (which includes a separate swap confirmation, for each Tranche and/or Series of Covered Bonds) with the Covered Bond Swap Provider (initially the Bank). The obligations under the covered bond swap confirmations are contingent and will only become effective on the Covered Bond Swap Effective Date. Further details can be found in the covered bond swap confirmations. None of these confirmations is effective and cashflows are not being exchanged pursuant thereto. The issuer, as the Covered Bond Swap Provider, may be required to post collateral to secure its obligations under the Covered Bond Swap Agreement upon activation of rating triggers. These rating triggers have not been activated, and no collateral has been posted yet. For details, please see *BMO Global Registered Covered Bond Program UKLA Base Prospectus - Overview of the Principal Documents—Covered Bond Swap Agreement*.

Further disclosures with regards to material risks and mitigants potentially affecting the issuer's performance of its obligations under the covered bond program can be found in *BMO Global Registered Covered Bond Program UKLA Base Prospectus* under *Risks relating to the Bank*

Credit Risk

In connection with the BMO Global Registered Covered Bond Program, the counterparties are the Swap Providers, the Servicer, the Cash Manager, the Cover Pool Monitor, the Custodian, the Bond Trustee, the Account Bank, the Standby Account Bank, the GDA Provider and the Standby GDA Provider (collectively, the Counterparties). Each of the Counterparties has represented and warranted in the Transaction Documents that it meets the Counterparty Qualifications

To manage the credit risk and counterparty risk associated with the program, ratings triggers and rating related actions for relevant counterparties to the program have been prescribed in the Transaction Documents, described in the *BMO Global Registered Covered Bond Program UKLA Base Prospectus* under *Overview of the Principal Documents* and *Glossary*, and disclosed on page 1 and 2 of this investor report.

Liquidity Risk

To manage liquidity risks in relation to the program, a Reserve Fund will be established by the Guarantor (or the Cash Manager on its behalf) in the GDA Account to reserve Available Revenue Receipts and Available Principal Receipts, if one or more Rating Agencies downgrades the ratings of the Bank below the Reserve Fund Required Amount Ratings, by no later than five Business Days following the downgrade.

Reserve Fund Required Amount and Reserve Fund Required Amount Ratings are described in *BMO Global Registered Covered Bond Program UKLA Base Prospectus* under *Glossary*. See *Specific Rating Related Action* on page 2 of this investor report for additional information on rating triggers.

Furthermore, all Series of Covered Bonds outstanding are soft bullet bonds and have a twelve-month extension period as described under *Maturity Structure* below.

Maturity Structure

An Extended Due for Payment Date twelve months after the Maturity Date has been specified in the Final Terms of each Series. The coupon rate specified for in this report for a Series applies until the Maturity Date of that Series, following which the floating rate of interest specified in the Final Terms of that Series is payable monthly in arrears from Maturity Date to but excluding the Extended Due For Payment Date.

In circumstances where neither the Bank nor the Guarantor has sufficient funds available to pay in full the Final Redemption Amount due on a Series of Covered Bonds on the relevant Final Maturity Date or within the relevant grace period, then the Final Maturity Date of the relevant Series of Covered Bonds may be deferred to an Extended Due for Payment Date, which is twelve months after the Final Maturity Date. To the extent the Guarantor has sufficient time and sufficient moneys to pay in part the Final Redemption Amount, such partial payment will be made by the Guarantor in accordance with the Priorities of Payments on any Interest Payment Date up to and including the relevant Extended Due for Payment Date. The Extended Due for Payment Date for a Tranche and/or Series of Covered Bonds is specified in its Final Terms Document or Pricing Supplement, which are available on the BMO Global Registered Covered Bond Program webpage under *Transactions*. Extendable maturity and relevant maturity extension triggers are described in *BMO Global Registered Covered Bond Program UKLA Base Prospectus* under *OVERVIEW OF THE PROGRAM - Extendable obligations under the Covered Bond Guarantee*.
