September 30, 2020
Forward looking statements & non-GAAP measures

Caution Regarding Forward-looking Statements

Bank of Montreal’s public communications often include written or oral forward-looking statements. Statements of this type may be included in this presentation, and may be included in other filings with Canadian securities regulators or the U.S. Securities and Exchange Commission, or in other communications. All such statements are made pursuant to the “safe harbor” provisions of, and are intended to be forward-looking statements under, the United States Private Securities Litigation Reform Act of 1995 and any applicable Canadian securities legislation. Forward-looking statements in this presentation may include, but are not limited to, statements with respect to our objectives and priorities for fiscal 2020 and beyond, our strategies or future actions, our targets, expectations for our financial condition or share price, the regulatory environment in which we operate and the results of or outlook for our operations or for the Canadian, U.S. and international economies, our response to the COVID-19 pandemic and its expected impact on our business, operations, earnings, results and financial performance and condition, including our regulatory capital and liquidity ratios and credit ratings, as well as its impact on our customers, competitors, regulation and trading exposures, and the potential for loss from higher credit, counterparty and mark-to-market losses, and include statements of our management. Forward-looking statements are typically identified by words such as “will”, “would”, “should”, “believe”, “expect”, “anticipate”, “project”, “intend”, “estimate”, “plan”, “goal”, “target”, “may” and “could.”

By their nature, forward-looking statements require us to make assumptions and are subject to inherent risks and uncertainties, both general and specific in nature. There is significant risk that predictions, forecasts, conclusions or projections will not prove to be accurate, that our assumptions may not be correct, and that actual results may differ materially from such predictions, forecasts, conclusions or projections. The uncertainty created by the COVID-19 pandemic has heightened this risk given the increased challenge in making assumptions, forecasts, conclusions or projections. We caution you not to place undue reliance on our forward-looking statements, as a number of factors – many of which are beyond our control and the effects of which can be difficult to predict – could cause actual future results, conditions, actions or events to differ materially from the targets, expectations, estimates or intentions expressed in the forward-looking statements.

The future outcomes that relate to forward-looking statements may be influenced by many factors, including but not limited to: general economic and market conditions in the countries in which we operate; the severity, duration and spread of the COVID-19 pandemic, its impact on local, national or international economies and its heightening of certain risks that may affect our future results; the possible impact on our business and operations of outbreaks of disease or illness that affect local, national or international economies; the Canadian housing market and consumer leverage; weak, volatile or illiquid capital and/or credit markets; interest rate and currency value fluctuations; changes in monetary, fiscal, or economic policy and tax legislation and interpretation; the level of completion in the geographic and business areas in which we operate; changes in laws or in supervisory expectations or requirements, including capital, interest rate and liquidity requirements and guidance, and the effect of such changes on funding costs, judicial or regulatory proceedings, the accuracy and completeness of the information we obtain with respect to our customers and counterparties, failure of third parties to comply with their obligations to us; our ability to execute our strategic plans and to complete and integrate acquisitions, including obtaining regulatory approvals; critical accounting estimates and the effect of changes to accounting standards, rules and interpretations on these estimates; operational and infrastructure risks, including with respect to reliance on third parties; changes to our credit ratings; political conditions, including changes relating to or affecting economic or trade matters; global capital markets activities; the possible effects on our business of war or terrorist activities; natural disasters and disruptions to public infrastructure, such as transportation, communications, power or water supply; technological changes; information, privacy and cyber security, including the threat of data breaches, hacking, identity theft and corporate espionage, as well as the possibility of denial of service resulting from efforts targeted at causing system failure and service disruption; and our ability to anticipate and effectively manage risks arising from all of the foregoing factors.

We caution that the foregoing list is not exhaustive of all possible factors. Other factors and risks could adversely affect our results. For more information, please refer to the discussion in the Risks That May Affect Future Results section, and the sections related to credit and counterparty, market, insurance, liquidity and funding, operational, legal and regulatory, business, strategic, environmental and social, and reputation risk, in the Enterprise-Wide Risk Management section that begins on page 68 of BMO’s 2019 Annual Report, and the Risk Management section in BMO’s Third Quarter 2020 Report to Shareholders, all of which outline certain key factors and risks that may affect our future results. Investors in the United States should carefully consider these factors and risks, as well as other uncertainties and potential events, and the inherent uncertainty of forward-looking statements. We do not undertake to update any forward-looking statements, whether written or oral, that may be made from time to time by the organization or on its behalf, except as required by law. The forward-looking information contained in this presentation is presented for the purpose of assisting you in understanding our financial position as at and for the periods ended on the dates presented, as well as our strategic priorities and objectives, and may not be appropriate for other purposes.

Material economic assumptions underlying the forward-looking statements contained in this presentation are set out in the Economic Developments and Outlook section on page 18 of BMO’s 2019 Annual Report and updated in the Economic Review and Outlook and the Allowance for Credit Losses sections set forth in BMO’s Third Quarter 2020 Report to Shareholders. Assumptions about the performance of the Canadian and U.S. economies, as well as overall market conditions and their combined effect on our business, are material factors we consider when determining our strategic priorities, objectives and expectations for our business. In determining our expectations for economic growth, we primarily consider historical economic data, past relationships between economic and financial variables, changes in government policies, and the risks to the domestic and global economy. Please refer to the Economic Review and Outlook and the Allowance for Credit Losses sections in BMO’s Third Quarter 2020 Report to Shareholders.

Non-GAAP Measures

Bank of Montreal uses both GAAP and non-GAAP measures to assess performance. You are cautioned that earnings and other measures adjusted to a basis other than GAAP do not have standardized meanings under GAAP and are unlikely to be comparable to similar measures used by other companies. Reconciliations of GAAP to non-GAAP measures, the rationale for their use, as well as the effects of changes in exchange rates on BMO’s U.S. segment reported and adjusted results can be found on pages 7 and 8 of BMO’s Third Quarter 2020 Report to Shareholders and on pages 17 and 23 of BMO’s 2019 Annual Report, all of which are available on our website at www.bmo.com/investorrelations. Examples of non-GAAP amounts or measures include: efficiency and leverage ratios; revenue and other measures presented on a taxable equivalent basis (teb); amounts presented net of applicable taxes; results and measures that exclude the impact of Canadian/U.S. dollar exchange rate movements (i.e. Constant currency basis or CCY), adjusted net income, revenues, non-interest expenses, earnings per share, effective tax rate, ROE, efficiency ratio, pre-provision pre-tax earnings, and other adjusted measures which exclude the impact of certain items such as, acquisition integration costs, amortization of acquisition-related intangible assets, reinsurance adjustment, restructuring costs, revaluation of U.S. net deferred tax asset as a result of U.S. tax reform and the remeasurement of an employee benefit liability as a result of an amendment to the benefits plan.

Bank of Montreal supplements supplemental information on combined business segments to facilitate comparisons to peers.

## Long track record of excellence in credit risk management

### Strong risk culture with clear and consistent risk appetite
- Harmonized North/South risk approach
- Robust credit monitoring and controls at all levels
- Integrated Special Accounts Management Unit (SAMU) with the business and Risk

### Long history in commercial lending
- Cornerstone of growth for the past decade
- Well diversified portfolio with attractive risk return profile

### Stable credit quality
- Maintained credit quality over 3 consecutive years of growth
- Structurally sound and highly secured portfolio resulting in relatively low loss rates

### Proactive risk management during COVID times
- Enhanced monitoring of industries of heightened focus
- Offered short-term payment deferrals on a select basis
Disciplined and integrated approach to risk management

Risk culture: A defining characteristic of BMO

Clear, consistent and harmonized wholesale lending-based risk appetite

Personal accountability for credit decisions

Seasoned risk managers with business and risk expertise

Risk teams embedded across the footprint

*Shaded areas on map denote location of risk management personnel across the BMO footprint
Credit origination

1st and 2nd Line establish clear policies, standards and financing guidelines
- Documents risk appetite for products, industries and sectors
- Sets underwriting parameters, including acceptable counterparties, structural elements, and credit metrics

Transaction approval subject to dual signature process based on appropriate discretionary limits

1ST LINE
**Origination & pre-screening by the business**

New transactions are pre-screened by qualified lenders in consultation with 2nd Line
- On strategy, on market
- Acceptable credit risk
- Appropriate returns

2ND LINE
**The BMO Commercial Lending Process**

1st Line must recommend
2nd Line provides independent oversight of transaction risk, confirming alignment with strategy, market, risk appetite, limits

Transaction declined by 1st Line
Transaction declined by 2nd Line
Transaction approved
Ongoing credit monitoring

Robust controls and monitoring in place at the enterprise, portfolio/segment, and transaction levels

- Enterprise framework for managing diversification, by single name, industry, product, portfolio and geography
  - **Enterprise wide stress testing**

- Underwriting parameters set by portfolio, product, segment, and/or industry
  - Monitoring against portfolio and segment limits and **adherence to underwriting parameters**
  - Ongoing portfolio analysis and ad hoc portfolio reviews
  - **Portfolio-level stress testing**

- Transaction level adherence to diversification limits and **adherence to underwriting parameters**
  - Quarterly trigger monitoring and annual reviews
  - **Transaction level stress testing**

- Transaction approval qualification requirements reviewed annually for 1st and 2nd line
  - Individual approval limits incorporate experience level, proactive credit management, and review of decision outcomes
Special Accounts Management Unit (SAMU)

SAMU is a specialized group within risk management that manages underperforming commercial & corporate loans >$1MM

Proactive and early management leads to higher repatriations and lower loss rates

Mandate
Help underperforming commercial clients return to profitability, or where that is not viable, minimize loan losses

How it’s done
Dedicated, experienced commercial lenders with industry and restructuring expertise
Work with Front Line to early identify problem accounts and any material portfolio trends

COVID response
Clearly articulated SAMU Game Plan to deal with any sudden and unexpected deterioration in the loan portfolio
Long history of commitment in commercial lending

Commercial lending is an important growth engine for BMO
• U.S. Commercial (53% of loans)
• Canadian Commercial (47% of loans)

While Business & Government PCL tends to increase more quickly in times of stress, long-term loss rates are lower than consumer

Business lending consistently produces lower loss rates

Gross Loans and Acceptances as of Q3 F2020

Consumer 43%
Business and Government 57%
Capital Markets 25%
Other 3%

Business & Government
• PCL bps
• Avg. PCL bps: 15

Consumer
• PCL bps
• Avg. PCL bps: 38
Business and Government overview

Focused growth over last 5 years relatively consistent with peer average

Diversification is a key ingredient to portfolio growth

Year-to-date growth in F2020 has moderated in line with economic environment

1. Business and Government loans include Capital Markets, Commercial and other. Balances as at period end
2. CAGR calculated for BMO and peers based on a 5 year period from Q3 F2015 to Q3 F2020
3. Industry Diversification represents percentage of Business and Government portfolio. Transportation industry growth between F2015 and F2020 primarily a result of acquisition of Transportation Finance portfolio
Commercial portfolio overview

Well diversified between Canada and U.S. and within the two countries

Diversified by industry sector, product type and without any significant single name concentrations

Long-term, focused growth strategy comprised of
• Leveraging localized sector and product expertise across geographies
• Diversifying outside of the bank’s core U.S. footprint

1. Represents portion of Business & Government loans managed within the Commercial business only.
   Balances as at period end.
2. Industry Diversification represents percentage of Commercial portfolio. Transportation industry growth between F2015 and F2020 primarily a result of acquisition of Transportation Finance portfolio.

BMO Investor Event 2020   |  September 30, 2020   |  24
Commercial risk metrics

New borrowers risk profile is stronger than the existing total portfolio

Consistent credit quality over time, including consistent watch and impaired balances throughout the period

Recent portfolio migration started in Q1 F2020 due to COVID pandemic

Migration is most pronounced, as expected, in the high COVID impacted industries, which represent a relatively small portion of the overall portfolio

---

1. WAPD = Weighted Average Probability of Default based on exposures, excluding defaulted loans and securitizations. New is defined as new borrower for trailing twelve months
Commercial loan growth has not impacted credit quality

New borrowers from F2018 and F2019 have not materially contributed to the increase in impaired balances or PCL.

PCL has grown in recent quarters, with stress in particular segments (e.g. Transportation) and COVID impacted businesses.

Commercial Impaired Balances – New vs. Existing

- Q4 F2019: New 96%, Existing 4%
- Q3 F2020: New 92%, Existing 8%

Commercial PCL on Impaired Loans – New vs. Existing

- F2019: New 88%, Existing 12%
- YTD F2020: New 87%, Existing 13%

Stress testing is fundamental to our risk management approach

**Portfolio Stress Testing**

Run individual portfolios through broad range of tail and more likely scenarios to:

- Ensure Risk-Return is appropriate
- Assess appropriateness of current risk appetite based on magnitude of losses and capital demand capacity

### Commercial Real Estate 3 Year Loss Rates

<table>

- 2.50%
Commercial lending has low loss rate on formations

Well structured and highly secured portfolio contributing to a **manageable loss rate of ~30% over the last three years**

- >80% of the total portfolio secured or government guaranteed
- ~95% of the total non-investment grade portfolio secured or guaranteed

Impaired balances have been increasing given the current market stress; however PCL has not grown at the same rate

- ~20% of impaired balances are comprised of low loss rate businesses such as Asset Based Lending

---

1. Government guaranteed includes COVID government support programs
Payment deferrals

13% of commercial portfolio has received payment relief since the start of the pandemic with only 5% still on deferral

~90% of active relief is set to expire by October 2020

Less than 10% of expired relief have been granted extensions

~2% of expired relief is showing defaults and/or delinquency since expiration

---

1. Payment relief in Canadian Business Banking was generally granted for a six month period. Payment relief in the U.S. was granted for a three month period

2. Scheduled relief remaining column represents the expected active relief remaining assuming that all relief set to expire through October 31 does not get extended
Industries of heightened focus

Industries of heightened focus represent 10% of the commercial portfolio.

1. Industries of heightened focus also include Airlines, Retail REITs, and Lodging REITs. These sub-segments are not displayed as loans are less than 1% of total commercial portfolio. Watchlist and impaired percentage as of Q3 F2020; all other metrics are Q2 and Q3 F2020 combined.

### Commercial Lending Portfolio: Industries of heightened focus

Key takeaways

1. Commercial credit risk profile within risk appetite and consistent with expectations

2. Recent loan growth has not disproportionately impacted credit quality, impairments, or PCL

This is a result of:
- Strong risk culture
- Robust credit process
- SAMU team excellence
- Portfolio diversification
- Appropriate lending structures
Closing Remarks

Tom Flynn | Chief Financial Officer
Key takeaways

North American Commercial Banking strength
- Unparalleled expertise and industry knowledge
- Good profitability, representing ~30% of bank revenues
- Diversified earnings source with attractive risk-return profile
- Strategic value, driving benefits to other businesses through One Bank approach

Strong risk culture and consistent risk appetite
- Disciplined and integrated risk management
- Robust credit monitoring and controls at all levels
- Harmonized North/South approach
- Better than peer loss rates over time

Proven strategy over time
- Resilient earnings power
- Strong balance sheet and capital position; flexibility to invest and grow in areas of strategic importance
- Well-positioned for current uncertain environment and eventual economic recovery
