NOTES TO USERS
Restatement of Prior Periods

Commencing with our Q1, 2005 supplementary financial information package, Fiscal 2004 and 2003 financial information was updated from the version released on November 23, 2004 to reflect the following changes adopted during Q1, 2005 in prior periods:

Change in Accounting - Preferred Shares and Capital Trust Securities

On November 1, 2004, we adopted the Canadian Institute of Chartered Accountant's (CICA) new accounting rules on the classification of financial instruments as liabilities or equity. The new rules require that financial instruments that are ultimately convertible into a variable number of our common shares at the holders' option be classified as liabilities. We reclassified \$450 million of our Class B Preferred shares, Series 4 and 6 from share capital to preferred share liability. In addition, we also reclassified \$1,150 million of our capital trust securities, previously recorded as non-controlling interest in subsidiaries in other liabilities to capital trust securities. The dividends declared on those preferred shares as well as the distributions made on those capital trust securities are now recorded as interest expense. While net income declined by \$45 million for the year ended October 31, 2004, this change did not impact earnings per share or net income available to common shareholders since preferred share dividends are deducted from net income in determining those measures. The new rules require that we retroactively reclassify prior periods.

Change in Accounting - Securities Borrowed and Lent for Cash Collateral

On November 1, 2004, securities borrowed were reclassified from business and government loans into securities borrowed or purchased under resale agreements, within the loans category in BMO's Consolidated Balance Sheet. Securities lent were reclassified from other liabilities into securities lent or sold under repurchase agreements in our Consolidated Balance Sheet. This change involves balance sheet only. Historical reclassifications were performed for comparative purposes.

Change in Allocation Methodologies

On November 1, 2004, BMO implemented new funds transfer pricing and cost methodologies. The new funds transfer pricing methodology is matched-maturity based, and the cost system is activity based. These enhancements provide more detailed profitability information. Although there is no impact on consolidated results, these changes had small impacts on the profit and loss of our operating segments. Historical reclassifications were performed to better align the comparative results of the banking groups.

Other Changes

Periodically, certain business lines or units within business lines are transferred between client groups to more closely align BMO's organizational structure and its strategic priorities. All comparative figures are reclassified to reflect these transfers.

Use of this Document

Information in this document is supplementary to the Bank's third quarter Press Release, MD&A, Financial Statements, and the 2004 Annual Report and should be read in conjunction with those documents.

Additional financial information is also available throughout the slide presentations for the Strategic Update, Financial Review and Risk Review, as well as the Conference Call Webcast. These can be accessed at our website at www.bmo.com/investorrelations.

This report is unaudited and all amounts are in millions of Canadian dollars, unless indicated otherwise.

Items indicated N.A. were not available.

Items indicated n.a. were not applicable.

Refer to the "Non-GAAP Measures" section of the "Financial Performance Review" included in the Management's Discussion and Analysis for an explanation of cash results, reporting on a taxable equivalent basis (teb) and net economic profit. Securities regulators require that companies caution readers that earnings and other measures adjusted to a basis other than generally accepted accounting principles (GAAP) do not have standardized meanings under GAAP and are unlikely to be comparable to similar measures used by other companies.

Other Accounting Changes
In The First and Second Quarters

Effective November 1, 2004 we adopted new accounting requirements of the Canadian Institute of Chartered Accountants. Refer to Note 2 of the Consolidated Financial Statements for more details.

Liabilities and Equity

On November 1, 2004, we adopted the Canadian Institute of Chartered Accountant's (CICA) new accounting requirements on the classification of financial instruments as liabilities or equity. The new rules require that our preferred shares and capital trust securities, which are ultimately convertible into a variable number of our common shares at the holders' option, be classified as liabilities. We reclassified \$450 million of our Class B Preferred shares, Series 4 and 6 from share capital to preferred share liability. In addition, we also reclassified \$1,150 million of our capital trust securities, Series A, B and C, previously recorded as non-controlling interest in subsidiaries in other liabilities, to capital trust securities. The dividends declared on those preferred shares as well as the distributions made on those capital trust securities are now recorded as interest expense. This change did not impact earnings per share or net income available to common shareholders since preferred share dividends are deducted from net income in determining those measures. We have restated prior periods' financial statements to be consistent with the new presentation, as is required under the new rules.

Variable Interest Entities

On November 1, 2004, we adopted the CICA's new accounting requirements on the consolidation of variable interest entities (VIEs). VIEs include entities where the equity invested is considered insufficient to finance the entity's activities. The new rules require that we consolidate VIEs if the investments we hold in these entities and/or the relationships we have with them result in us being exposed to a majority of their expected losses, being able to benefit from a majority of their expected residual returns, or both, based on a calculation determined by standard setters. Prior period financial statements were not restated for this change.

Beginning on November 1, 2004, we consolidated our customer securitization vehicles. We grouped the assets and liabilities of these VIEs into other assets and other liabilities, respectively, and all impacts on net income before provision for income taxes were recorded in non-interest revenue - other, as it was our intention to restructure these VIEs. The impact on our Consolidated Balance Sheet on November 1, 2004, was an increase in other assets of \$21,160 million, a decrease in derivative financial instrument assets of \$67 million, an increase in other liabilities of \$21,150 million, a decrease in derivative financial instrument liabilities of \$15 million and a decrease in shareholders' equity of \$42 million. The impact on shareholders' equity arose because interest rate swaps held by our VIEs to hedge their exposure to interest rate risk did not qualify for hedge accounting prior to consolidation. The mark to market adjustments on those derivatives from their inception to November 1, 2004 would have been recognized in income. Since the new rules require us to reflect the results of the consolidated VIEs as if they had always been consolidated, without restatement of prior periods, the amount of mark to market losses prior to November 1, 2004 was recognized through our opening retained earnings. The adjustment was being amortized into income over the remaining life of the swaps. These derivatives qualified for hedge accounting while the VIEs were consolidated.

On April 29, 2005, we completed the restructuring of our customer securitization VIEs by either terminating or changing the terms of our swaps with the VIEs and amending some of the rights of noteholders in the VIEs. As a result they no longer meet the criteria for consolidation. The impact on our Consolidated Statement of Income of consolidating these VIEs for the six month period ended April 30, 2005, was an increase in non-interest revenue - other of \$5 million, related to the reversal of mark to market losses over the life of the related swaps. The impact on the Consolidated Statement of Income of deconsolidating these entities on April 29, 2005, was an increase in non-interest revenue - other of \$44 million, an increase in income taxes of \$7 million and an increase in net income of \$37 million, representing the reversal of the unamortized mark to market losses on swaps that had been charged against retained earnings. As these VIEs are no longer consolidated, there was no impact on the Consolidated Statement of Income for the three months ended July 31, 2005. Our involvement with these and other VIEs is summarized in Note 8 of our consolidated financial statements for the year ended October 31, 2004, as set on pages 96 and 97 of our 2004 Annual Report.

Merchant Banking Investments

On November 1, 2004, we adopted the CICA's new accounting requirements applicable to our merchant banking subsidiaries. The new rules require these subsidiaries to account for their investments at fair value with changes in fair value recorded in net income. Previously, these subsidiaries accounted for their investments at cost. The impact of this change in accounting on our Consolidated Statement of Income for the nine months ended July 31, 2005, including the initial adjustment to fair value on November 1, 2004, was an increase of \$42 million in non-interest revenue, investment securities gains (losses), an increase in income taxes of \$14 million and an increase in net income of \$28 million.

For information on future accounting changes, please see the section of our third quarter Press Release entitled "Future Accounting Changes."

Users may provide their comments and suggestions on the Supplementary Financial Information document by contacting Krista White at (416) 867-7019 or krista.white@bmo.com.

Net Income by Operating Group
Basis of Presentation

The results of these operating groups are based on our internal financial reporting systems. The accounting policies used in these groups are generally consistent with those followed in the preparation of the consolidated financial statements as disclosed in Notes 1 and 2 to the unaudited interim consolidated financial statements for the quarter ended July 31, 2005.

Notable accounting measurement differences are the taxable equivalent basis adjustment and the provision for credit losses.

Provisions for Credit Losses

Provisions for credit losses are generally allocated to each group based on expected losses for that group over an economic cycle. Differences between expected loss provisions and required provisions under GAAP are included in Corporate Support.

Inter Group Allocations

On November 1, 2004, we implemented new funds transfer pricing and cost methodologies. The new funds transfer pricing methodology is matched - maturity based, and the cost system is activity based. These enhancements provide more detailed profitability information. Although there is no impact on consolidated results, these changes had small impacts on the profit and loss of our operating segments. Historical reclassifications were performed to better align the comparative results of the banking groups.

Geographic Information

We operate primarily in Canada and the United States but also have operations in the United Kingdom, Europe, the Caribbean and Asia, which are grouped in Other Countries. We allocate our results by geographic region based on the location of the unit responsible for managing the related assets, liabilities, revenues and expenses, except for the consolidated provision for credit losses, which is allocated based upon the country of ultimate risk.

Prior period results have been restated to give effect to the current period's presentation and organization structure.

Trading revenues include interest earned on trading securities and other cash instruments held in trading portfolios, less funding costs associated with trading-related derivatives and cash instruments, and realized and unrealized gains and losses on trading securities, other cash instruments, derivatives and foreign exchange activities.

Interest rates includes Canadian government securities, corporate debt instruments and interest rate derivatives.

Foreign exchange includes foreign exchange spot and foreign exchange derivatives contracts from our wholesale banking business.

Equities includes institutional equities, equity derivatives and proprietary trading.

Other includes commodities, managed futures, credit investment management, Harris trading and global distribution loan trading and sales.

(1) Net income - Canadian GAAP has been restated to conform to the current period's presentation (see Note 2 to the unaudited interim consolidated financial statements for the quarter ended July 31, 2005). Consequently, the United States GAAP adjustments have also been restated to reflect this change. However, net income and earnings per share - United States GAAP remain the same as previously reported.

(2) On November 1, 2004, we adopted fair value accounting for our merchant banking investments for Canadian GAAP purposes (see Note 2 to the unaudited interim consolidated financial statements for the quarter ended July 31, 2005). Under United States GAAP, we have not adopted fair value accounting for these investments.

Gap Position Major Assumptions - Assets and Liabilities

- Fixed rate assets such as residential mortgage loans and consumer loans, are reported based upon the scheduled repayments and estimated prepayments that reflect expected borrower behaviour.
- Trading and Underwriting (mark-to-market) assets and interest bearing assets on which the customer interest rate changes with the prime rate or other short-term market rates are reported in the 0 to 3 months category.
- Fixed rate and non-interest bearing assets with no defined maturity are reported based upon expected account balance behaviour.

Gap Position Major Assumptions - Deposits/ Liabilities

- Fixed rate liabilities, such as investment certificates, are reported at scheduled maturity with estimated redemptions that reflect expected depositor behaviour.
- Interest bearing deposits on which the customer interest rate changes with the prime rate or other short-term market rates are reported in the 0 to 3 months category.
- Fixed rate and non-interest bearing liabilities with no defined maturity are reported based upon expected account balance behaviour.

Capital

- Common shareholders' equity is reported as non-interest sensitive.

Earnings Sensitivity/Economic Value Sensitivity - Interest Rate Risk

"Earnings Sensitivity" is the impact of change in interest rates on twelve month net income, while, "Economic Value Sensitivity" is the impact of a change in interest rates on the value of our assets and liabilities.

All measures are as at end of day for the reported date.

"100/200 Basis Point Increase/Decrease" is the impact on earnings and economic value of a one time increase/decrease of 100/200 basis points in interest rates, applied to our position at the period end. In all cases, Interest Rate scenarios did not fall below 0%. Calculations do not reflect the effect of actions which the bank may take to reduce risk.

Structural portfolios are CAD/U.S. consumer and commercial and Canada Corporate instruments and securitization structures. For these portfolios, calculations include the impact of minimum rates on deposits and the expected impact of customer behavior on embedded options and balances.

Earnings Sensitivity and Economic Value Sensitivity for money market / accrual and mark to market portfolios are for major currency, interest rate exposures only.

Money market/accrual exposures are bank placements and acceptances, repos and reverse repos, international loans and certain investment securities.

While categorized as trading and underwriting, these portfolios are accounted for using accrual accounting rules under GAAP.

Mark to market portfolios are all trading and underwriting portfolios where accounting rules mandate mark to market treatment.

Earnings Volatility and Market Value Exposure

"Earnings Volatility and Market Value Exposure" are the impact on twelve month earnings and economic value, respectively, of a one time change in market rates/prices applied to our positions at the period end. Calculations are based upon the estimated maximum adverse rates/price change that can occur within the time period required to neutralize the risks in a portfolio. Calculations are also based upon a statistical analysis of history using a 99% confidence level, and do not reflect the effect of actions which the bank may take to reduce risk.

The increase in Commodities MVE and EV in the third quarter of Fiscal 2005 is primarily the result of limitations in our existing model. The Bank will implement a resolution for this limitation in the fourth quarter, Fiscal 2005.

In the first quarter of Fiscal 2005, a one-day correlated Earnings Volatility model for money market / accrual portfolios in trading and underwriting was implemented for market risk management and reporting purposes.

Money market / accrual portfolios comprise bank placements and acceptances, repos and reverse repos, international loans and certain investment securities.

While categorized as trading and underwriting, these portfolios are accounted for using accrual accounting rules under GAAP.

Interest rate risk is the primary driver of market risk in the money market / accrual portfolios.

Mark to market portfolios are all trading and underwriting portfolios where accounting rules mandate mark to market treatment.

Structural portfolios are CAD/U.S. consumer and commercial and Canada Corporate instruments and securitization structures. Risk positions include asset/liability interest rate mismatches and embedded options and foreign exchange transaction risk affecting net income.

The Total Bank earnings volatility and market value exposure measures are conservative as they do not include the benefit of correlation between the mark to market, money market / accrual, and structural portfolios.

All measures are as at end of day for the reported date.
