Restatement of Prior Periods**Changes**

Periodically, certain business lines or units within business lines are transferred between client groups to more closely align BMO's organizational structure and its strategic priorities. All comparative figures are reclassified to reflect these transfers.

Use of this Document

Information in this document is supplementary to the Bank's fourth quarter Press Release, MD&A, Financial Statements, and the 2005 Annual Report and should be read in conjunction with those documents.

Additional financial information is also available throughout the slide presentations for the Strategic Update, Financial Review and Risk Review, as well as the Conference Call Webcast. These can be accessed at our website at www.bmo.com/investorrelations. This report is unaudited and all amounts are in millions of Canadian dollars, unless indicated otherwise.

Items indicated N.A. were not available.
Items indicated n.a. were not applicable.

Refer to the "GAAP and Related Non-GAAP Measures used in the MD&A" section of the "Financial Performance Review" included in the Management's Discussion and Analysis for an explanation of cash results, reporting on a taxable equivalent basis (teb) and net economic profit. Securities regulators require that companies caution readers that earnings and other measures adjusted to a basis other than generally accepted accounting principles (GAAP) do not have standardized meanings under GAAP and are unlikely to be comparable to similar measures used by other companies.

Changes in Accounting Policy

During Fiscal 2006, we adopted new accounting requirements of the Canadian Institute of Chartered Accountants. Refer to Note 2 of the Consolidated Financial Statements.

Settlement Date Accounting

During the quarter ended July 31, 2006, we changed our accounting policy for securities transactions from the trade date basis of accounting to the settlement date basis of accounting for the Consolidated Balance Sheet. We have restated prior periods' financial statements for this change.

Stock-Based Compensation

During the quarter ended July 31, 2006, we adopted the Canadian Institute of Chartered Accountants' ("CICA's") new accounting requirements on stock-based compensation. The new rules require that stock-based compensation granted to employees eligible to retire should be expensed at the time of grant. Previously, we amortized the cost over the vesting period. We have restated prior periods' financial statements for this change.

Variable Interest Entities

On November 1, 2004, we adopted the CICA's new accounting requirements on the consolidation of variable interest entities ("VIE's"). As a result, we consolidated our customer securitization vehicles as at November 1, 2004. The impact on our Consolidated Balance Sheet on November 1, 2004 was an increase in other assets of \$21,160 million, a decrease in derivative financial instrument assets of \$67 million, an increase in other liabilities of \$21,150 million, a decrease in derivative financial instrument liabilities of \$15 million and a decrease in opening retained earnings of \$42 million.

The impact on opening retained earnings arose because interest rate swaps held by our VIEs to hedge their exposure to interest rate risk did not qualify for hedge accounting prior to consolidation. Since the new rules required us to reflect the results of the consolidated VIEs as if they had always been consolidated, without restatement of prior periods, the amount of mark-to-market losses prior to November 1, 2004 was recognized through our opening retained earnings. These derivatives qualified for hedge accounting after we started consolidating the VIEs.

On April 29, 2005, we completed the restructuring of our customer securitization VIEs and as a result they no longer met the criteria for consolidation. The impact on our Consolidated Statement of Income of deconsolidating these entities on April 29, 2005, was an increase in non-interest revenue, other, of \$44 million, an increase in income taxes of \$7 million and an increase in net income of \$37 million, representing the reversal of the unamortized mark-to-market losses on swaps that had been charged against opening retained earnings.

During the year ended October 31, 2006, we adopted new accounting guidance that provides additional clarification on VIEs and their consolidation requirements. There was no material impact on our consolidated financial statements.

Our involvement with these and other VIEs is summarized in Note 8 to our consolidated financial statements for the year ended October 31, 2005, as set out on pages 105 and 106 of our 2005 Annual Report.

For information on future accounting changes, please see the section of our fourth quarter Press Release entitled "Future Accounting Changes."

Users may provide their comments and suggestions on the Supplementary Financial Information document by contacting Krista White at (416) 867-7019 or krista.white@bmo.com.

Net Income by Operating Group
Basis of Presentation

The results of these operating groups are based on our internal financial reporting systems. The accounting policies used in these groups are generally consistent with those followed in the preparation of the consolidated financial statements as disclosed in Notes 1 and 2 to the unaudited interim consolidated financial statements for the quarter ended October 31, 2006.

Notable accounting measurement differences are the taxable equivalent basis adjustment and the provision for credit losses, as described below.

Taxable Equivalent Basis

We analyze net interest income on a taxable equivalent basis ("teb"). This basis includes an adjustment which increases GAAP revenues and the GAAP provision for income taxes by an amount that would raise revenues on certain tax-exempt securities to a level that would incur tax at the statutory rate.

Provisions for Credit Losses

Provisions for credit losses are generally allocated to each group based on expected losses for that group over an economic cycle. Differences between expected loss provisions and provisions required under GAAP are included in Corporate Services.

Inter-Group Allocations

Various estimates and allocation methodologies are used in the preparation of the operating groups' financial information. We allocate expenses directly related to earning revenue to the groups that earned the related revenue. Expenses not directly related to earning revenue, such as overhead expenses, are allocated to operating groups using allocation formulas applied on a consistent basis. Operating group net interest income reflects internal funding charges and credits on the groups' assets, liabilities and capital, at market rates, taking into account relevant terms and currency considerations. The offset of the net impact of these charges and credits is reflected in Corporate Services.

Geographic Information

We operate primarily in Canada and the United States but also have operations in the United Kingdom, Europe, the Caribbean and Asia, which are grouped in Other countries. We allocate our results by geographic region based on the location of the unit responsible for managing the related assets, liabilities, revenues and expenses, except for the consolidated provision for credit losses, which is allocated based upon the country of ultimate risk.

Prior periods have been restated to give effect to the current period's organization structure and presentation changes.

Trading revenues include interest earned on trading securities and other cash instruments held in trading portfolios, less internal and external funding costs associated with trading-related derivatives and cash instruments, and realized and unrealized gains and losses on trading securities, other cash instruments, derivatives and foreign exchange activities.

Interest rates includes Canadian government securities, corporate debt instruments and interest rate derivatives.

Foreign exchange includes foreign exchange spot and foreign exchange derivatives contracts from our wholesale banking business.

Equities includes institutional equities, equity derivatives and proprietary trading.

Other includes commodities, managed futures, credit investment management, Harris trading and global distribution loan trading and sales.

(1) Intangible assets in excess of 5% of gross tier 1 capital are deducted from tier 1 capital as required by OSFI guidelines.

(2) Reflects the qualification of existing preferred shares of a subsidiary as tier 2 capital.

(3) OSFI permits the inclusion of the lesser of the balance of the general allowance for credit losses and 0.875% of risk-weighted assets.

(1) On November 1, 2005, we prospectively adopted the new accounting standard on Stock-Based Compensation (see Note 9 to the unaudited interim consolidated financial statements for the quarter ended October 31, 2006).

Under United States GAAP, Stock-Based Compensation granted to employees eligible to retire should be expensed at the time of grant. During the quarter ended July 31, 2006, we retroactively adopted new Canadian accounting guidance on Stock-Based Compensation, which is harmonized with United States GAAP. Due to the differences in method of adoption, there will continue to be an adjustment to the Consolidated Statement of Income until the Stock Based Compensation granted prior to November 1, 2005 has been fully amortized.

(2) On November 1, 2004, we adopted fair value accounting for our merchant banking investments for Canadian GAAP purposes (see Note 2 to the unaudited interim consolidated financial statements for the quarter ended October 31, 2005). Under United States GAAP, we have not adopted fair value accounting for these investments.

(1) Segmented credit information by geographic area is based upon the country of ultimate risk.

(2) Aggregate balances are net of specific and general allowances; the consumer, commercial and corporate categories are stated net of specific allowances only.

(3) The Mortgages and Total Consumer (excluding Government Guaranteed Student Loans) delinquency ratios include Household Mortgage balances, previously excluded from the ratio calculations.

Gap Position Major Assumptions - Assets

- Fixed rate, fixed term assets, such as residential mortgage loans and consumer loans, are reported based upon the scheduled repayments and estimated prepayments that reflect expected borrower behaviour.
- Trading and Underwriting (mark-to-market) assets and interest bearing assets on which the customer interest rate changes with the prime rate or other short-term market rates are reported in the 0 to 3 months category.
- Fixed rate and non-interest bearing assets with no defined maturity are reported based upon an imputed maturity profile that considers pricing and volume strategies and is reflective of the associated uncertainties.

Gap Position Major Assumptions - Deposits/ Liabilities

- Fixed rate, fixed term liabilities, such as investment certificates, are reported at scheduled maturity with estimated redemptions that reflect expected depositor behaviour.
- Interest bearing deposits on which the customer interest rate changes with the prime rate or other short-term market rates are reported in the 0 to 3 months category.
- Fixed rate and non-interest bearing Liabilities with no defined maturity are reported based upon an imputed maturity profile that considers pricing and volume strategies and is reflective of the associated uncertainties.

Capital

- Common shareholders' equity is reported as non-interest sensitive.

Earnings Sensitivity/Economic Value Sensitivity - Interest Rate Risk

"Earnings Sensitivity" is the impact of change in interest rates on twelve month net income, while, "Economic Value Sensitivity" is the impact of a change in interest rates on the value of our assets and liabilities.

"100/200 Basis Point Increase/Decrease" is the impact on earnings and economic value of a one time increase/decrease of 100/200 basis points in interest rates, applied to our position at the period end.

In all cases, Interest Rate scenarios did not fall below 0%. Calculations do not reflect the effect of actions which the bank may take to reduce risk.

Losses are in brackets and benefits are presented as positive amounts.

Structural portfolios are CAD/U.S. consumer, commercial and corporate instruments and securitization structures. For these portfolios, risk measures reflect asset/liability interest rate mismatches, embedded options, including the expected impact of customer behaviour, and the impact of minimum rates on deposits.

Earnings Sensitivity and Economic Value Sensitivity for money market / accrual and mark to market portfolios are for major currency, interest rate exposures only.

Money market/accrual exposures are bank placements and acceptances, repos and reverse repos, international loans and certain investment securities.

While categorized as trading and underwriting, these portfolios are accounted for using accrual accounting rules under GAAP.

Mark to market portfolios are all trading and underwriting portfolios where accounting rules mandate mark to market treatment.

Earnings Volatility and Market Value Exposure

"Earnings Volatility and Market Value Exposure" are the impact on twelve month earnings and economic value, respectively, of a one time change in market rates/prices applied to our positions at the period end. Calculations are based upon the estimated maximum adverse rates/price change that can occur within the time period required to neutralize the risks in a portfolio. Calculations are also based upon a statistical analysis of history using a 99% confidence level, and do not reflect the effect of actions which the bank may take to reduce risk.

Losses are in brackets and benefits are presented as positive amounts.

In the fourth quarter of Fiscal 2005, enhancements were made to the measurement of commodity risk.

In the third quarter of 2006, enhancements were made to the measurement of credit spread risk.

Money market / accrual portfolios comprise bank placements and acceptances, repos and reverse repos, international loans and certain investment securities.

While categorized as trading and underwriting, these portfolios are accounted for using accrual accounting rules under GAAP.

Interest rate risk is the primary driver of market risk in the money market / accrual portfolios.

Mark to market portfolios are all trading and underwriting portfolios where accounting rules mandate mark to market treatment.

Structural portfolios are CAD/U.S. consumer, commercial and corporate instruments and securitization structures. For these portfolios, risk measures reflect asset/liability interest rate mismatches, embedded options, including the expected impact of customer behaviour, the impact of minimum rates on deposits and foreign exchange transaction risk affecting net income.

Structural MVE declined in Q1 Fiscal 2006 owing to lower modeled interest rate volatility. Interest rate volatility is derived from 10 years of historical data, which starting in Q1 excluded the high volatility associated with Fiscal 1995.

The Total Bank earnings volatility and market value exposure measures are conservative as they do not include the benefit of correlation between the mark to market, money market / accrual, and structural portfolios.
