

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

BMO LGM Frontier Markets Fund

Class A USD Income Shares (ISIN IE00B54MVM56), a sub-fund of BMO Investments II (Ireland) plc.
This Fund is managed by LGM Investments Limited.

Objectives and investment policy

The Fund aims to grow the value of your investment over the long term by investing mainly in a diversified portfolio of equity securities (shares) of companies established in, or deriving a significant amount of their income and profit from, frontier markets worldwide. Frontier markets are markets at a very early stage of development, which typically involves higher risk, and potentially higher returns, than developed markets and emerging markets.

The Fund selects quality companies based on four key criteria: sustainable business models; robust balance sheets; proven management teams; and a clear alignment of interest between majority and minority shareholders. Valuations, market capitalisation, liquidity and the amount of dividends paid to shareholders are also important considerations for stock selection.

The Fund may use derivatives to gain exposure to its target markets, manage risk and help meet the Fund's objective. A derivative is a financial instrument whose value is based on the performance of another financial asset, index or investment.

Portfolio transaction costs are paid from the assets of the Fund in addition to the charges set out in the Charges section below and may reduce its returns.

The Fund may invest in other types of eligible investments which are disclosed in the prospectus.

Class A USD Income shares pay a dividend to you once per year, within four months of the Fund's December 31st financial year end.

You may sell your shares on the fifteenth and last day of each month on which banks in Dublin and London are open for business or on the previous day such banks are open if closed on such day by submitting an application to the administrator, State Street Fund Services (Ireland) Limited, by 4:00 p.m. (Irish time) one business day prior to such day.

There is no minimum holding period for this Fund. However, it may not be appropriate for investors who plan to withdraw their money in under 5 years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

The risk category is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not guaranteed to remain unchanged, and it may shift over time. The lowest risk category does not mean the investment is "risk free".

The Fund is in category 5 because changes in the price of its shares have typically been moderate.

The Fund may also be exposed to other risks that the risk indicator does not adequately capture. These may include:

Frontier markets risk: securities in frontier markets may involve a higher degree of risk because these markets may be more unstable than developed and emerging markets due to regulatory, political, economic and social factors. They are typically less liquid and may experience greater volatility in prices and currencies than more established markets.

Currency risk: investing in assets denominated in a currency other than the Fund's currency exposes the value of the investment to exchange rate fluctuations.

Liquidity risk: the Fund may not be able to sell or buy certain investments at a suitable time or at a reasonable price.

Counterparty risk: a counterparty to a financial contract with the Fund could fail to return money or instruments belonging to the Fund.

Derivatives risk: where derivatives are used to obtain, increase or reduce exposure to an asset, index or investment, these derivatives may have an impact on the Fund's risk profile.

Operational risk: management, business or administration processes, including those to do with the safekeeping of assets, may fail, leading to losses.

For a more detailed explanation of these and other risks, please refer to the "Risk Factors" section of the prospectus for the Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	4.25%
Exit charge	4.25%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	2.46%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	20%
-----------------	-----

The entry and exit charge include a charge of up to 1.25% which may be retained by the Fund to cover the cost of buying or selling securities by the Fund and preserve the value of the Fund.

The ongoing charges figure is based on expenses for the year ending March 2018. This figure may vary from year to year. It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units in another collective investment undertaking.

The performance fees are calculated in accordance with the methodology described in the prospectus using a participation rate of 20% of any returns the Fund achieves above the benchmark, composed of 50% of the MSCI Frontier Markets Index (net dividends reinvested) and 50% of the MSCI Frontier Markets ex GCC Countries Index (net dividends reinvested). In the Fund's last financial year the performance fee was 0.18% of the Fund.

For more information about charges, please see the section entitled Fees and Expenses in the Fund's prospectus.

Past performance

You should be aware that past performance is not a guide to future performance.

Fund launch date: 28/11/2011.

Share/unit class launch date: 14/12/2011.

Performance is calculated in USD.

This chart shows how much the Fund increased or decreased in value as a percentage in each year.
