## Reference Composition

## Is this GIC right for you?

This GIC may be right for you if you:

- ✓ are looking to diversify your portfolio with a shorter term investment
- ✓ would like principal protection and a guaranteed minimum return
- ✓ are willing to accept a guaranteed return that is less than the return offered on traditional GICs but have, instead, the potential to earn higher market-linked returns
- ✓ can keep your money invested until the end of the term

## Key Benefits

Blue chip companies are generally large companies with a history of providing stable returns to investors over the long term. This GIC is an excellent way for you to access these returns with the security of principal protection.

- ✓ Principal protection – 100% of your original investment is returned to you at maturity
- ✓ Minimum guaranteed return
- ✓ Higher return potential based on the performance of Canadian blue chip companies
- ✓ Designed in partnership with BMO Capital Markets®, a market leader in creating innovative investment solutions
- ✓ Guaranteed by Bank of Montreal
- ✓ Eligible for Canada Deposit Insurance Corporation (CDIC) deposit insurance up to applicable limits

BMO Blue Chip GICs are issued by Bank of Montreal Mortgage Corporation and guaranteed by Bank of Montreal. The principal amount of a BMO Blue Chip GIC is guaranteed and is repayable upon maturity and, in addition, the GIC provides a minimum guaranteed rate of return, but there is no guarantee you will receive any additional return based on the performance of the Reference Portfolio. The rate of return for the term payable is the Guaranteed Rate of Return for the Term plus the variable rate(s) of return on the Reference Portfolio, if any, but will not be less than the Guaranteed Rate of Return for the Term or more than the Maximum Rate of Return for the Term. The rate of return for the term is determined without reference to any dividends or distributions paid on the securities. Each variable rate of return is the average of the effective returns on each security in the Reference Portfolio on the applicable calculation date (the "Average Effective Return"). The effective return of each security is based on the actual return of each security calculated as the percentage increase or decrease in the price of the security (the "price returns") from the second business day after the issue date to the applicable calculation date. The effective return of each security used to calculate the Average Effective Return on a calculation date is determined as follows: if a price return is positive, the effective return is the maximum return for each security as set out in the Terms and Conditions for the GIC; if the price return is equal to or greater than the minimum floor return as set out in the Terms and Conditions for the GIC but less than or equal to zero, the effective return is the price return; and if the price return is less than the minimum floor return, the effective return is the minimum floor return. If market disruptions or other special circumstances affect the calculation of the return, the calculation agent may adjust or delay the calculation or payment of interest, estimate the value of a security in the Reference Portfolio, replace a security and/or determine the amount of interest, if any, that may be payable in an alternate manner. The Terms and Conditions for BMO Blue Chip GICs are available at your local BMO Bank of Montreal branch. BMO Blue Chip GICs are not available in an RSP if the GIC's maturity date is after the date you are required to convert your RSP to a RIF.
