# BMO Global Commodities Fund, a sub-fund of BMO Investments (Ireland) plc

## Class A US\$ Accumulating ISIN IE00B73BFN63

### Objectives and Investment Policy

The fund aims to grow the value of your investment over the longer term. The fund invests mainly in equities of companies that are commodity producers or their suppliers, generally in the following global commodities sectors: agriculture, base metals & steel, energy and precious metals. The fund expects to be diversified across these sectors, as well as by geography. The fund may invest in companies of any size; however, it generally invests in medium to large size companies. The fund may invest in companies located anywhere in the world, including emerging markets, that provide exposure to one or more of the targeted commodities sectors and whose shares are traded in regulated markets. The fund may also invest in other investment funds, including exchange traded funds.

The fund may invest more than 20% of its assets in the emerging markets (markets at an early stage of development).

Portfolio transaction costs are paid from the assets of the fund in addition to the charges set out in the "Charges" section below and may reduce its returns.

For temporary defensive purposes, the fund may invest, without limitation, in US and non US short term money market instruments.

The fund may invest in other types of eligible investments, as disclosed in the prospectus for the fund.

This share class does not intend to distribute net income and gains.

You may sell your shares on any day on which banks in Dublin, London, New York and Toronto are open for business by submitting an application to the administrator, State Street Fund Services (Ireland) Limited, by 10:30 a.m. (Irish time) on such day.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money in the short term.

### Risk and Reward Profile

The risk category is based on historical data and may not be a reliable indication of the future risk profile of the fund. The risk category shown is not guaranteed to remain unchanged, and it may shift over time. The lowest risk category does not mean the investment is "risk free".

The fund is in category 6 because changes in the price of its shares have been large and/or frequent.

The fund may also be exposed to material risks that the risk indicator does not adequately capture. These may include:

**Emerging markets risk:** securities in emerging markets may involve a higher degree of risk because these markets may be more unstable than developed markets due to regulatory, political, economic and social factors.

**Currency risk:** investing in assets denominated in a currency other than the share class currency exposes the value of the investment to exchange rate fluctuations.

**Liquidity risk:** the fund may not be able to sell or buy certain investments at a suitable time or at a reasonable price.

**Counterparty risk:** a counterparty to a financial contract with the fund could fail to return money or instruments belonging to the fund.

**Operational risk:** management, business or administration processes, including those to do with the safekeeping of assets, may fail, leading to losses.

For a more detailed explanation of these and other risks, please refer to the "Risk Factors" section of the prospectus for the fund.
